Eco Toilets

NIXILOO
by Larin Design

2023 Winner
GRANDS PRIX DU DESIGN
Awards
Furniture - Urban & Street,
Platinum award

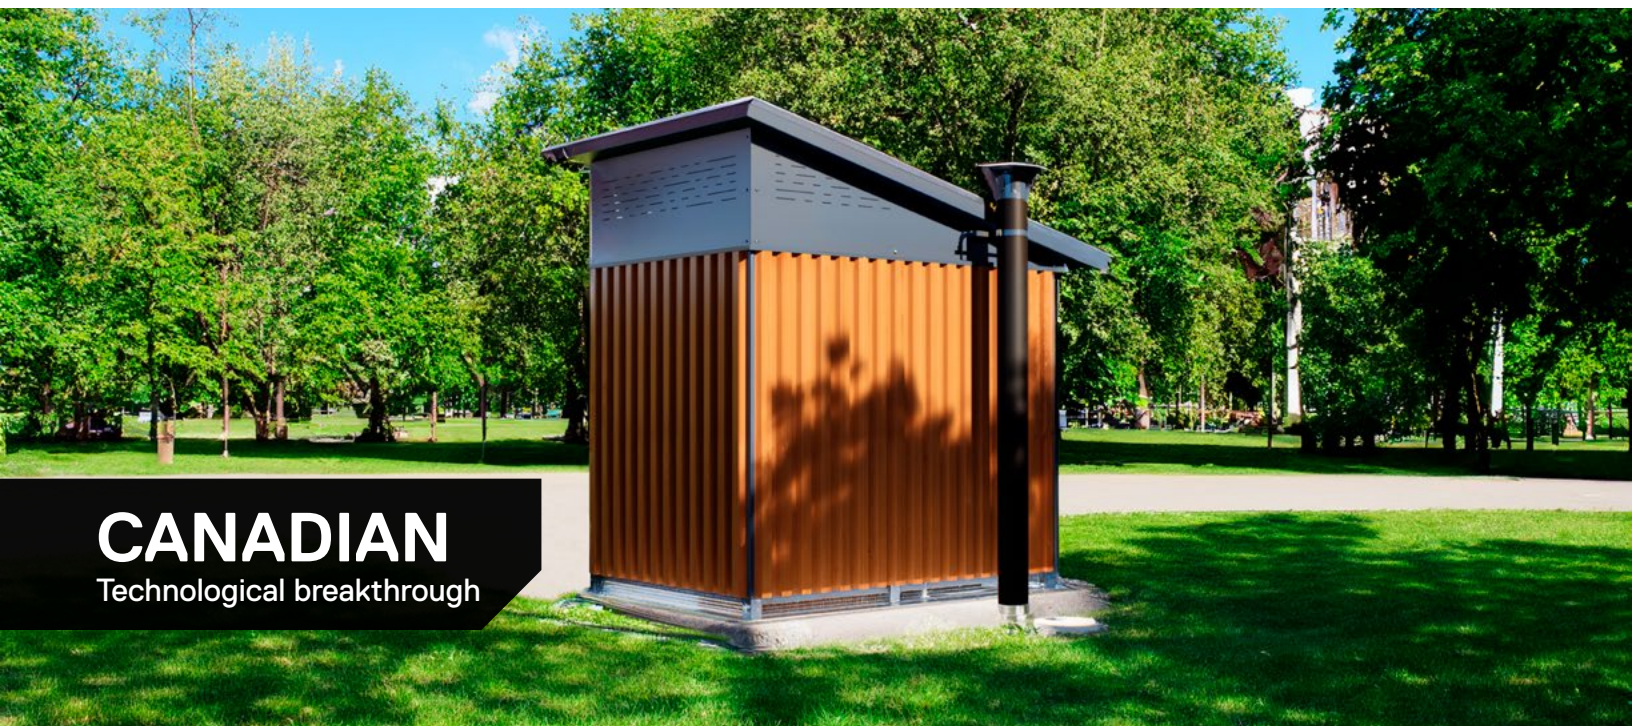

An innovative, sustainable solution designed to meet the needs of outdoor public spaces.

Made from sturdy galvanized steel, Nixiloo offers not only exceptional structural durability, but also features designed to improve accessibility.

Unlike traditional toilets, our self-sufficient toilets operate **without water, electricity, sewage or chemicals**. They draw their energy from the sun and wind, minimizing their impact on the environment. Thanks to an ingenious process of separating liquids and solids by gravity, our toilets prevent maceration and eliminate unpleasant odours. **A solar-powered ventilation system** creates a constant air current that accelerates the evaporation of liquids and dries out solids, **ensuring an odor-free, comfortable hygienic experience for users**.

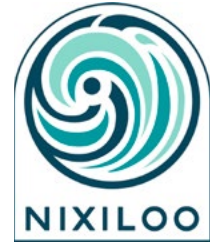

Perfect for nature parks, beaches, public gardens and more, our eco-friendly toilets offer a practical, environmentally responsible solution. **Provide a obstacle-free environment for all your users while contributing to a more sustainable future.**

CANADIAN
Technological breakthrough

NIX-001

Eco toilet, Accessible model

Dimensions

2935mm x 3150mm x 3105mm (116in x 124in x 123in)

Interior surface area

4,6m² (49.5ft²)

Cabin materials

Galvanized steel

**SINGLE and DOUBLE configurations also available.
Contact us for more information!**

OPERATION

- Continuous forced ventilation ensures evaporation up to 3 times faster than conventional models, reducing the number of drainings
- Faster drying of solids prevents unpleasant odours

SOLAR PANEL

- Allows the toilet to be installed without constraints of orientation or shade
- Provides the energy required for continuous forced ventilation
- LED lighting with automatic switch-on

MAINTENANCE

- Solids can be collected by pump truck or manually
- Easy-to-access, low-cost annual maintenance with liquid level window
- Not subject to CSA A2.77 and NSF/ANSI 41 no to Q-2,r,22

ACCESSIBILITY

- Sliding door for easy access, built to B651-18 standards for people with reduced mobility
- Ergonomic, vandal-proof seat and sturdy stainless steel support bar

Setting trends in public spaces design.
