

OUTDOOR PLAY,
FITNESS AND
FURNITURE

KOMPAN®

Publisher: KOMPAN A/S

KOMPAN Group is one of the world's leading manufacturers of outdoor activity areas.

For more than 50 years, the company has designed, manufactured and marketed an extensive range of high-quality playground equipment, outdoor fitness equipment, and outdoor furniture.

KOMPAN® products are sold around the world through KOMPAN subsidiaries, agents and distributors.

Made Green

means that the products are made of up to 95% post-consumer recycled materials such as ocean waste, used textiles, food packaging waste, used plastic bags, etc. Our Made Green products are made with an approximately 50% reduction in carbon emissions compared to similar traditional products made from virgin sources (depending on the chosen product).

Born Green

means products are made from natural hardwoods like robinia. Robinia is highly durable and does not require any chemical wood preservatives. KOMPAN Robinia products also come with FSC® certification (C004450).

Look for the icon

This icon marks selected product examples with extra high percentage of recycled material and reduced carbon footprint.

Fitness equipment

marked with this symbol can be used directly from a wheelchair.

Inclusive Fitness

Fitness equipment marked with this symbol can be used by everyone on equal terms independent of gender, age, body weight, fitness, or cognitive skills.

Look for FSC®-certified products on product pages. The mark of Responsible Forestry.

Safety standards

Product safety is a long tradition in KOMPAN and we take great pride in testing and evaluating each product before launch.

KOMPAN products meet relevant safety standards depending on the type of product. Playground equipment meets ASTM F1487 and for products intended for users under the age of 2 years, we use ASTM F2373.

Outdoor fitness equipment is compliant with ASTM F3101 and multi-sports equipment meet the European standard EN15312.

Whenever possible, we design worldwide products, meaning the equipment also meets the equivalent European standards and we pick the specifications covering both.

The International Play Equipment Manufacturers Association (IPEMA) provides a third-party certification to ensure product conformance to specific ASTM and/or CSA standards. Each product promoted here, if certified by IPEMA, includes the name and model number for you to search the IPEMA website for verification. To verify product certification, visit www.ipema.org and conduct a search.

KOMPAK!

CREATING HEALTHIER AND HAPPIER COMMUNITIES

This is who we are: a round dot in a square world

We have come a long way since the early days of KOMPAN. What started in the 1970s in Danish artist Tom Lindhart's cellar has grown into purpose-built headquarters in Odense, offices worldwide, and an immense factory in the Czech Republic, shipping deliveries every 44 minutes to destinations worldwide. Whether an entirely new playground, an integrated play and fitness site, or a significant landmark, we have a solution.

Our purpose and promise

Creating healthier and happier communities will always be our driving force. Whether you are new to KOMPAN or already know us, this is who we are:

At its core, KOMPAN is all about play, activity, and social infrastructure — much like it was when children in a drab, gray housing estate

began climbing on a piece of contemporary art in the 1970s. For over 50 years, we have led the way in playground and fitness innovation, crafting environments that foster community and well-being. We specialize in bespoke solutions tailored to your vision and brought to life by our expert team of consultants, architects, and project managers.

Half a century later and three generations removed from those first children climbing on art, KOMPAN remains at the forefront of recognizing and promoting the undeniable value of play and fitness, with a promise to continue leading the way.

Let's Play

Works of “play”

That original street art, created to differentiate the anonymous blocks of flats, became a focal point and a plaything—and artist Tom Lindhardt didn't mind at all. In fact, it was what he'd dreamt of. With the support of a similarly inspired entrepreneur, Mogens Fenne Frederiksen, they formed a company and started a revolution in play.

A TRUSTED PARTNER IN PLAY AND FITNESS

This is what you get

Ethics in everything we do

For more than 50 years, KOMPAN has been committed to our users and customers. Each year, we make significant investments in research, innovation, and product testing, allowing us to design playgrounds and fitness sites that have best-in-class play value, training effects, and safety standards. We also uphold our responsibility to society through ambitious green initiatives and practices. Incorporating post-consumer recycled waste sources has become central to our business and we continue to push the boundaries of sustainability on behalf of the entire industry. Self-manufacturing in our own production facility, using only the very best materials, enables us to deliver playgrounds and fitness sites with the highest durability and longevity. All in the name of creating healthier and happier communities.

Read more about this on pages 14-19.

Unique products and innovation

Our iconic products, or rather 'works of play,' such as the Crazy Hen, Supernova, Cliff Rider, and Spacenet™, embody our pioneering design spirit, blending craftsmanship with a dedication to our Danish design heritage. KOMPAN was born out of art. Half a century ago, sculptor Tom Lindhardt observed children playing on his artistic creations. Tom brought the process full circle, transforming playgrounds into beautiful, timeless creations, much like works of art. In the following years, we introduced our market-leading, scalable, and adjustable fitness products that replicate the functional and effective fitness experiences found in indoor facilities. Read more about this on pages 4-5.

KOMPAN Play Institute

The institute has been part of developing, researching, and advocating playgrounds for KOMPAN since the 1980s. The institute merges cutting-edge research in child development with hands-on testing, ensuring our designs inspire and engage children of all abilities. Our commitment is backed by rigorous documentation, white papers, and publications that delve deep into playground-specific topics. The aim is to ensure children develop social, cognitive, health, and creative skills through our WOW, STAY, & DEVELOP design approach. Beyond design, we offer expert consultancy and advocacy, shaping city planning to prioritize spaces where every child can thrive. Read more about this on pages 10-11.

KOMPAN Fitness Institute

As pioneers of authentic outdoor fitness, we are dedicated to designing spaces that challenge and engage people of all ages and abilities through effective workouts. Exercise and fresh air are natural partners and the universal formula for feeling good. Today, we are aware of the positive results of physical exertion. Our 21st-century lifestyles demand it, but achieving the right balance takes a scientific approach on what to do, how to do it, and what to do it on. This is where research, design, and product innovation meet reality. We collaborate with sports physiologists and physiotherapists as well as universities and sports researchers to deliver effective and impactful outdoor equipment. Read more about this on pages 12-13.

Customized solutions

We understand that our customers have diverse needs and seek unique features in their playground or fitness spaces, including aesthetics, theme design, age groups, and the capacity for simultaneous play. A theme park may want to make a WOW playground in order to attract children. A school may want a very physical playground where children can burn energy in order to concentrate better during lessons. A municipality may want to create an activity site with both a playground and fitness equipment. Our architects, landscape architects, and designers customize solutions to meet your needs, the needs of your users, your environments, and your preferences. Read more about this on pages 22-23.

Unique landmarks and concepts with KOMPAN Design Studio

KOMPAN's Design Studio creates built-from-scratch playgrounds and fitness areas that are tailored to say something about the community they serve. They are landmarks, as distinctive as a gift of nature, or an architectural gem. From Australia to France, from Germany to Singapore, these are unique statements from communities wishing to stand out, ready to make their mark. Read more about this on pages 26-31.

Inclusive, universal design for play and fitness

Our design philosophy is that everyone should feel included. Regardless of their physical or mental ability, play and fitness are for everyone. The human need for play, physical activity, and social interaction across abilities is what we plan for. We build facilities that aren't merely accessible, but are intentionally inclusive and usable by all to the greatest possible extent. Each playground and fitness site reflects the needs of its users, whether for play, exercise, or simply sitting back to watch the next generation thrive. Universal inclusive design means a stigma-free playground for everyone. Read more about this on pages 10-13.

Guidance from idea to finished project

Building a playground may sound as easy as playing, but can be a very complex and complicated process. We are ready to take the burden off your shoulders and be your partner in the process. We help you find the best products and best layout for you, your users, and your site. We ensure that everything arrives on time at the site, including clearing the area, digging foundations, installing products, laying safety surfacing, and constructing paths, fences, benches, and more. With in-house production in most markets as well as installation, we maintain full control of every project. Our certified installers and superior aftermarket service guarantee lasting satisfaction. Read more about this on pages 24-25.

Highest quality materials

Playgrounds will have to stand the wear and tear of weather and heavy usage. A KOMPAN site will maintain its appeal for years with minimal effort or maintenance, ensuring users can get as many hours of joy as possible. Therefore, we use the highest quality materials that will look inviting for decades to come and require the least amount of maintenance. This is also why our warranties are best in class. Over time, this has proven to be the most effective and cost-efficient solution. Read more about this on pages 20-21.

WOW Factor

With eyes wide open to capture the full scene, the mouth forms an 'O,' eagerly inhaling air in anticipation of action, while the legs run wildly in search of adventure. This is the WOW Factor, the moment of arrival at the playground that distinguishes a KOMPAN design from all others. It satisfies the child's instinctive demand for change, variety, and advancement. The constant cry for something new and exciting is only successfully met by triggering that initial WOW.

STAY Factor

'Oh no, not yet' is the expression we most love to hear in response to the suggestion to head home. It epitomizes the STAY Factor. Each time a play feature is approached, it should be a fresh encounter, open to new interpretation. The STAY Factor nurtures social interaction, inspiring children of all ages and abilities to stay and play longer.

DEVELOP Factor

Play is all about fun. Well, not all. Behind the laughter and occasional tears, it's about development: personal, cooperative, and competitive. The DEVELOP Factor is the endless mission of the KOMPAN Play Institute experts. These specialists craft ways of developing motor skills, coordination, and balance. Intellectual learning is equally vital, with cognitive development, communication, language expansion, and understanding of how to turn the nucleus of an idea into a successful conclusion.

**Apelviken**

Varberg Municipality, Sweden
 In collaboration with: Landscape Architects

PLAY THE KOMPAN WAY

Described in three little words: WOW, STAY, DEVELOP

KOMPAN's unique solutions attract more users, make them stay longer, and make them return again and again. Because whatever we develop, we develop together with our users: children of all ages and abilities. WOW, STAY,

DEVELOP, three distinct factors that are molded into every KOMPAN solution and radiantly displayed in the happy faces of each new generation. Play is the open door to the future.

See More

PLAY VALUE GUARANTEED

At the KOMPAN Play Institute, we have studied child development and children’s outdoor play for four decades

Play is vital for child well-being and life skills, be it for a toddler or a teenager. KOMPAN playgrounds are carefully designed to motivate all children to play; to play relentlessly again and again, while developing important life skills and friendships. Children need play stimulation for their physical, cognitive, creative, and

social-emotional development. This includes children with both invisible and visible disabilities. Especially with the rise in neurodiversity diagnoses. Our research aims at creating playground equipment and playgrounds for all: accessible, inclusive, and usable in play.

1 Recording children’s outdoor play

With action cameras and movement screening, we study what triggers children to play and to continue playing. We learn what makes children play, move, talk, and cooperate. This informs our product design to stimulate the social-emotional skills, language, and communication.

2 Collaborating on focused research

Science and universities are a major source of our fundamental research and knowledge. We cooperate with universities and draw on this in all product development. The collaboration takes several forms, such as joint industry Ph.D. students.

3 Following and sharing research

To constantly stay on top of new research, KOMPAN Play Institute participates in conferences, building networks to share and gain insight and knowledge.

Playgrounds for all:

Accessible, inclusive, and usable in play:

- Is it developed with users?
- Is it spacious and can it accommodate different body positions, sizes, and abilities?
- Is it thrilling, challenging, and pleasurable?
- Is it rich in play variation: sensory, physical, social-emotional, cognitive-creative?
- Is it transparent and has a 360-degree design?

Read more and download our checklist at kompan.com

4 User workshops

Children are the experts in what motivates them to play and what they like to play. Their preferences develop with age and with cultural changes. We conduct workshops where children share their ideas on playgrounds and give us feedback on our newest ideas.

5 Testing new play ideas

Prototypes are tested at their earliest stages in order to prove and perhaps improve relevance. This helps fine-tune important basics, such as the placing of components and creating interaction in teamwork.

6 Prototypes in their natural habitat

When children play in their outdoor setting and on their terms, they use play features differently from a laboratory setting. We install prototypes in kindergartens and schools to ensure that the children truly get the benefit we intended and that they deserve.

THE SCIENCE OF EXERCISE

The KOMPAN Fitness Institute develops equipment and design recommendations based on scientific research and user testing. It's where research, design, and product innovation meet reality.

At the KOMPAN Fitness Institute, we use science to create outdoor fitness equipment and solutions. Outdoor fitness has traditionally been based on simple equipment with less functionality than indoor fitness. However, the available equipment must provide real exercise

benefits and a positive user experience to motivate people to exercise regularly. When developing outdoor fitness products that provide an optimal exercise experience, we focus on two key aspects: ergonomics and the resistance experienced by the user.

1 User study: all types of user needs

First, we gather data from our users through structured user studies. To enable the best designs, we conduct methodic research on our target users to expose problems and design opportunities by analyzing the target audience's needs and pain points.

2 Using science and knowledge

We turn to science to deeply understand our target audiences' behaviors and needs. We collaborate with multiple scientific disciplines within the Faculty of Health Sciences, nationally and internationally, to uncover all relevant insights and knowledge.

3 Leveraging user research with user workshops

User workshops are a critical part of our design process. This is where we gain valuable insight through usability testing and accessibility evaluations from users in their own environment.

Together, our individual fitness products create a comprehensive fitness solution that benefits the user. To make a real impact, creating ideal solutions for any specific type of user—regardless of their abilities—must be evidence-based.

Read more about our research and principles for inclusive fitness and download whitepapers at [kompan.com](https://www.kompan.com)

4 Collaboration with exercise experts, designers and engineers

We put any issues into perspective by collaborating with exercise experts, designers, and engineers to ensure our products deliver value and provide the most socially engaging and effective user experience for all abilities.

5 Lab-testing and iterations

Prototypes are tested at their earliest stages. We conduct biochemical, movement pattern, muscle group, and oxygen uptake analyses to put the product to the test. This ensures that we deliver the most effective outdoor fitness equipment possible.

6 Feedback from users = More than 1000 sites worldwide

The end product is ready to use. We get instant feedback from our users worldwide. The science behind it provides not only optimal user experience but also a durable, robust product that withstands the test of time and wear and tear.

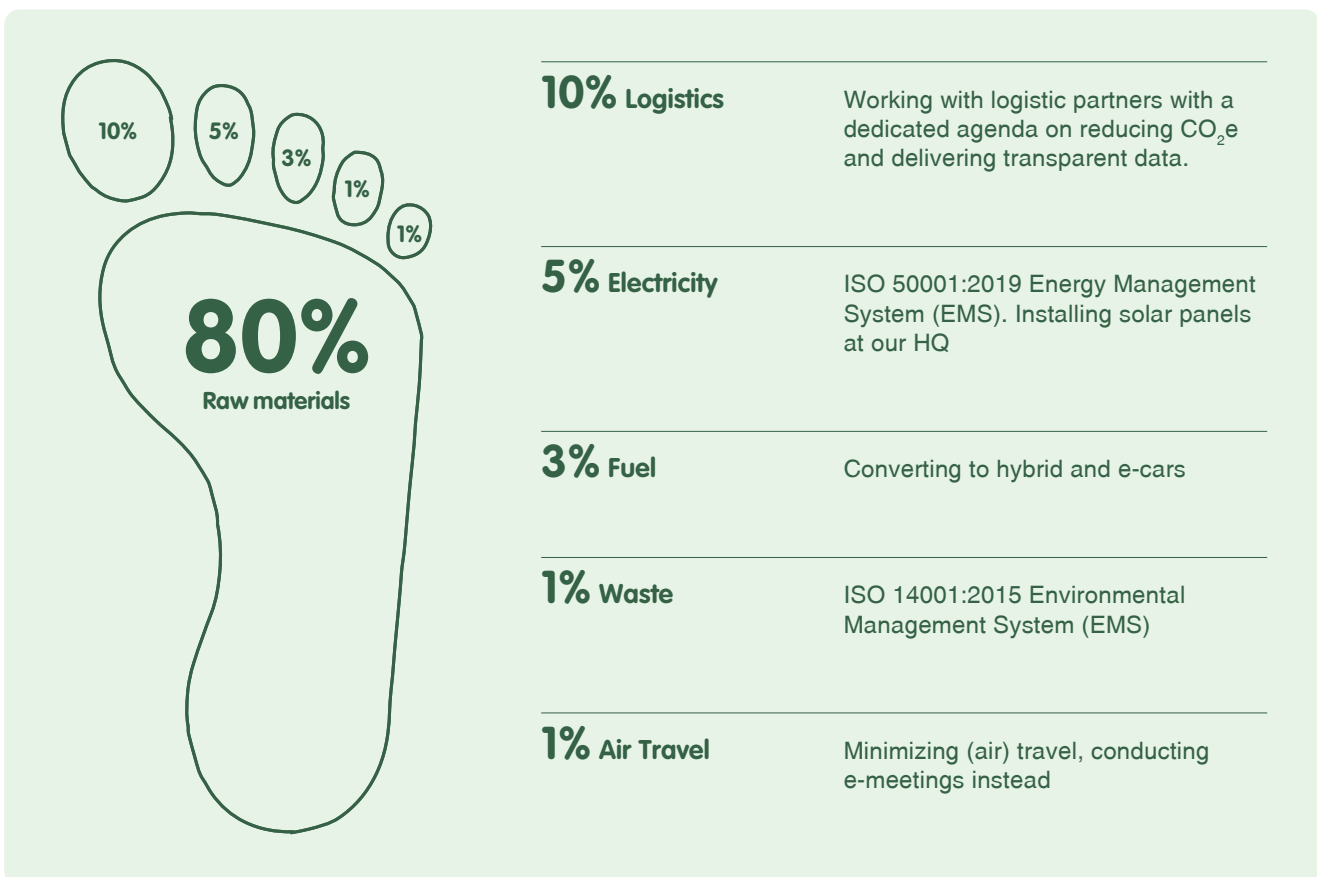

VIRGIN RAW MATERIALS – THE CLIMATE CULPRIT OF CO₂e

We are taking significant steps to tackle the #1 climate culprit in our business: raw materials. Greenhouse Gas (GHS) guidance and tools identified the issues, and from there, we focused on reducing our emissions. To make fundamental changes, you need to look at the entire life cycle of your products. It is a continuous journey for us. This is how far we have come:

KOMPAN chose the Greenhouse Gas Protocol to focus our efforts on the areas with significant impact on reducing our carbon footprint. We found that approximately 80% of the carbon emissions were a result of the use of raw materials in our production of playground

and fitness equipment. We turned data into action, and from 2024, we can now make colorful playgrounds with 95% recycled materials, using post-consumer recycled waste in HDPE panels, tempered Corocord™ rope with EcoYarn™, and TexMade™ posts.

LOOK FOR THE ICON

A range of our products has a significantly reduced footprint due to their material composition. Look for this icon to spot selected product examples that have an extra high percentage of recycled material and reduced carbon footprint.

Made from 75% post-consumer recycled waste — Made Green

Tempered Corocord rope with EcoYarn™
Our Corocord ropes are designed for optimal strength, abrasion resistance, and all-weather durability. These ropes are made to withstand vandalism, ensuring longevity and safety in various environments. The ropes are tightly wrapped with tempered PES EcoYarn™, which is melted onto each strand using over 95% post-consumer recycled material. This process enhances the rope's durability and significantly reduces waste. Corocord ropes are available in eight colors and six dimensions (7 mm, 16 mm, 19 mm, 21 mm, 22 mm, and 23 mm) and cater to different needs while maintaining their environmental benefits. Depending on the size, the ropes have either a steel or fiber core, ensuring optimal application performance — Made Green.

VALIDATED CO₂e CALCULATIONS

For many years, we at KOMPAN have been working with sustainability and environmental concerns in our product development and we do not take shortcuts in our approach to this incredibly important aspect of design:

We work with Bureau Veritas who validates our method for calculating carbon footprints. We enable customers to choose lower carbon emissions by choosing products that are either Made Green or Born Green.

We make carbon footprint data available for all standard products for comparison of carbon emissions data — Made Green or Born Green products versus traditional products. These can be found on our websites and product sheets — Made Green or Born Green products versus traditional products.

Born Green means products are made from natural hardwoods like robinia. Robinia is highly durable and does not require any chemical wood preservatives. KOMPAN Robinia products also come with FSC® certification (C004450).

Made Green means that products are made of up to 95% post-consumer recycled materials such as ocean waste, used textiles, food packaging waste, used plastic bags, etc. Our Made Green products are made with an approximately 50% reduction in carbon emissions compared to similar traditional products made from virgin sources (depending on the product).

Complete transparency

Green data is available for all our products for comparison of carbon emissions.

Validation of CO₂ calculation

BUREAU VERITAS
HSE Denmark A/S

MADE FROM RAW MATERIALS WITH LOWER CARBON EMISSIONS

Made Green from post-consumer waste or Born Green from nature

Tempered Corocord ropes

are tightly wrapped with tempered PES Eco-Yarn™, which is melted onto each strand using over 95% post-consumer recycled material.

BLOQX™ climbing panels

are made from 75% post-consumer recycled waste, such as household waste, and the teal-colored version is made from ocean-recycled waste – Made Green.

Robinia products

are made of robinia wood from primarily FSC®-certified (C004450) forestry that develops so much oil when growing that it is self-sustaining and very long-lasting — Born Green.

1. Colored panels

in EcoCore™ HDPE are made from >95% post-consumer recycled waste, including the colored cap layer — Made Green.

2. TexMade™

posts are made from >95% post-consumer recycled textile and plastic waste — Made Green.

3. Decks

are made from 75% post-consumer recycled waste — Made Green.

4. Extruded aluminum

profiles are made using low-carbon aluminum — Made Green.

5. Ocean Green panels

in the color teal are made from >95% post-consumer ocean recycled waste collected from the maritime industry such as fishing nets, ropes, and trawl nets — Made Green.

Colored rotomolded components

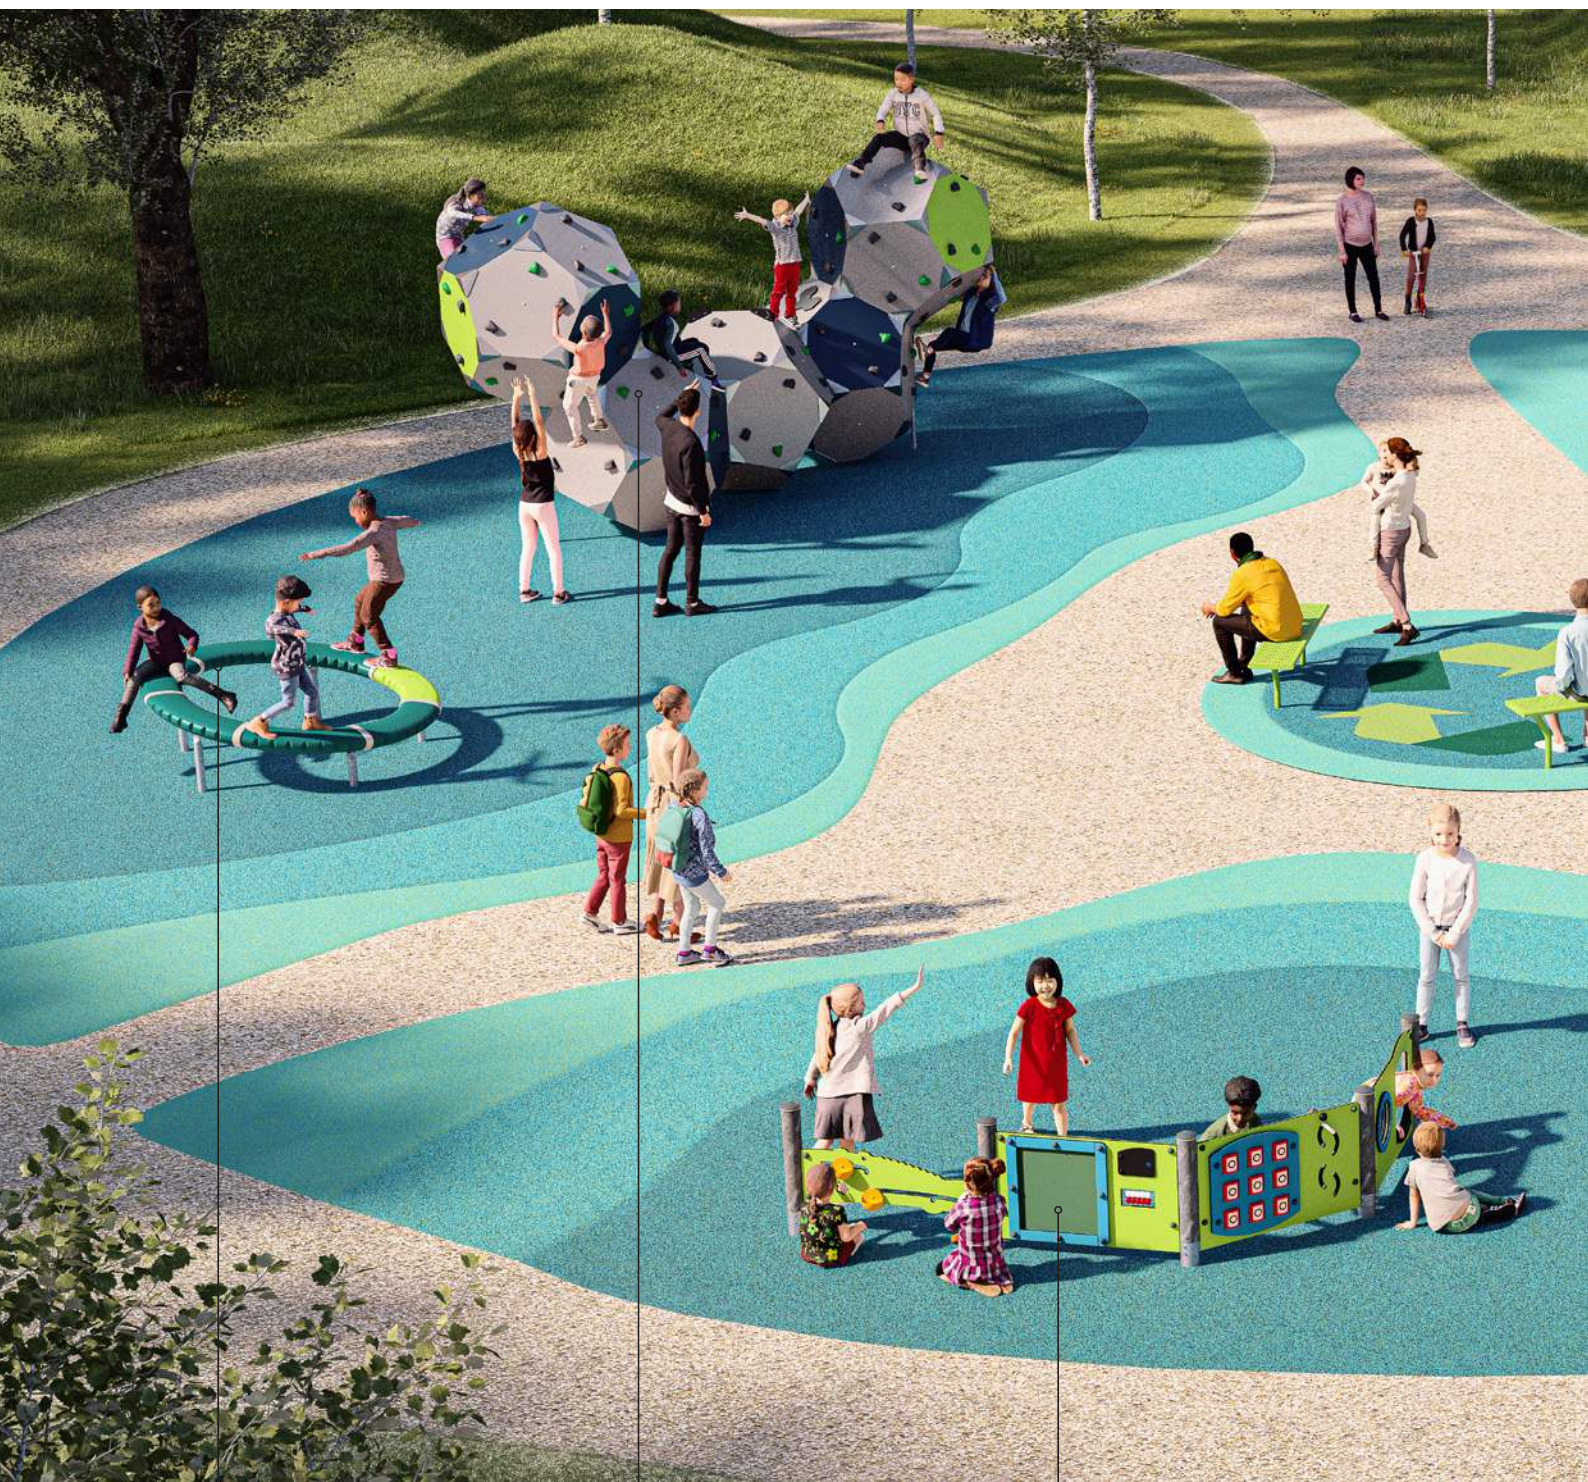

used for Supernova, Spinner Bowl, Tipi Carousel, etc. are made from 33% post-consumer recycled waste from household waste. The teal colored version is made from ocean recycled waste only — Made Green.

HIGHEST QUALITY MATERIALS

Panels

The 19 mm EcoCore™ panels are a highly durable and eco-friendly material, which is not only recyclable after use, but also made from >95% post-consumer recycled waste.

Decks

All decks are supported by uniquely designed low-carbon aluminum profiles with multiple attachment options. The gray-colored molded decks are made of 75% post-consumer PP material with a non-skid pattern and textured surface.

Tempered Corocord™ rope with EcoYarn™

Ropes come with galvanized six-strand steel wires and a steel core, impossible to wear through. Each strand is tightly wrapped with EcoYarn™ made from >95% post-consumer recycled material, which is melted onto each individual strand. This makes the ropes highly wear- and vandalism-resistant.

Posts

Main posts are available in five different materials.

1. Impregnated pine wood with in-ground steel footing.
2. Galvanized steel with powder-coated top finish.
3. Color-anodized lead-free aluminum made from low-carbon aluminum.
4. TexMade™ posts made from 95% post-consumer recycled textile and plastic waste.
5. Low-carbon pre-galvanized steel posts made from 80% post-consumer recycled material.

Galvanized steel

Our steel surfaces and steel frames are hot-dip galvanized inside and outside with lead-free zinc. The galvanization has excellent corrosion resistance in outside environments and is maintenance free.

Robinia wood

Robinia wood is a very strong and long-lasting material with very high levels of natural oils. Thus, Robinia wood makes durable playgrounds almost maintenance free and able to last for many years.

Nothing lasts forever. All playgrounds face the trials of weather, use, and abuse, and will eventually succumb to the ravages of time. That day can be postponed for a lifetime by using the finest of materials and the cleverest of designs. Quality costs, but quality also lasts. A simple equation that in the fullness of time pays dividends.

WARRANTY

We have industry-leading warranties

LIFETIME* warranty

- Hot-dip galvanized parts
- Stainless-steel parts
- EcoCore™ and other high-density polyethylene (HDPE) parts

*KOMPAN's LIFETIME warranty is in effect for the lifetime of the product until the product is uninstalled and/or taken out of use. In addition, KOMPAN's general terms and delivery conditions apply and supplement this warranty.

15-year warranty

- High-pressure Laminate (HPL) parts
- Aluminum parts

10-year warranty

- TexMade™ posts
- Pre-galvanized posts with painted top layer
- Painted surface on galvanized or aluminum metal parts
- Stainless Steel Slides
- Electrogalvanized metal parts
- Molded PP decks
- Solid plastic parts
- Hollow plastic parts
- Transparent Poly Carbonate (PC) parts
- Rope and net constructions
- Wood-plastic composite (WPC) parts
- Robinia, ash, pine, and other wood types

5-year warranty

- Resin coated plywood parts
- Springs and ball bearing assemblies
- Graphic print on transparent PC panels
- Concrete parts
- Galaxy Connection Balls

2-year warranty

- Moveable plastic and metal parts
- Rubber membranes
- Screens and electronic parts
- Sunshades & sail solutions
- Nylon nets
- Spare parts

Warranty coverage

This warranty applies to KOMPAN's products for the time periods described for each product type above and with the limitations described in this warranty. The warranty period applies from the date of purchase by the first customer. This warranty covers only defects in materials, production errors, and structural integrity failures caused by defects in design, materials, or manufacturing. KOMPAN's liability under this warranty is limited to repair or replacement of defective products, without charge, at KOMPAN's discretion.

Proper installation and maintenance

The warranty only applies if KOMPAN's products have been installed according to the instructions provided by KOMPAN and maintained correctly according to the KOMPAN Maintenance Manual. All warranty claims shall be accompanied by full documentation for proper installation and maintenance.

Warranty exclusions

This warranty does not cover any damage caused by accident, improper care, negligence, normal wear and tear, surface corrosion on metal parts, discolored surfaces, and other cosmetic issues or failures due to misuse or vandalism. Natural changes in wood over time are considered cosmetic issues and are not covered.

Near water installations

Products installed in direct contact with chlorinated water or saltwater (waterparks), or products installed within 650 feet from the shore are not covered by the KOMPAN warranty for any defects caused by corrosion. Specially designed products (handled via department for customized products), provided they have been upgraded to corrosion class C4 prior to delivery, installed within 650 feet from the shore (and not in direct contact with saltwater/spray of saltwater or

chlorinated water(e.g. waterparks) shall, subject to the applicable warranty period for each product type set out in the general warranty, be covered only against structural failure caused by corrosion (excluding moving parts) and under no circumstances for any period longer than 5 years.

Third-party supplied products and services

KOMPAN provides non-KOMPAN branded products and installation services performed by certified third-party suppliers. This general KOMPAN warranty does not apply to such non-KOMPAN branded products and installation services, which may carry their own warranties. KOMPAN will pass on information about such warranties where possible.

Freight and warehousing

Global transport and logistics arranged by Kompan appointed forwarder. Products/items are not to be stored outside while awaiting installation and must be kept dry at all times.

LET'S PLAN WITH KOMPAN'S PLANNING RESOURCES AND TOOLS

- With the 8-step Playground Planning Checklist and downloadable product files

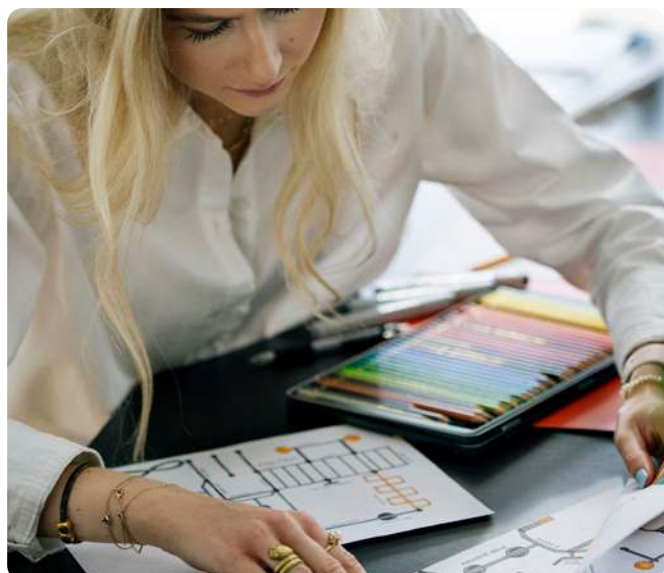

With over 50 years of experience building amazing playgrounds and outdoor fitness sites worldwide, we've learned a thing or two about planning for success. Our playground planning tools and resources will help you simplify the process and make the right decisions.

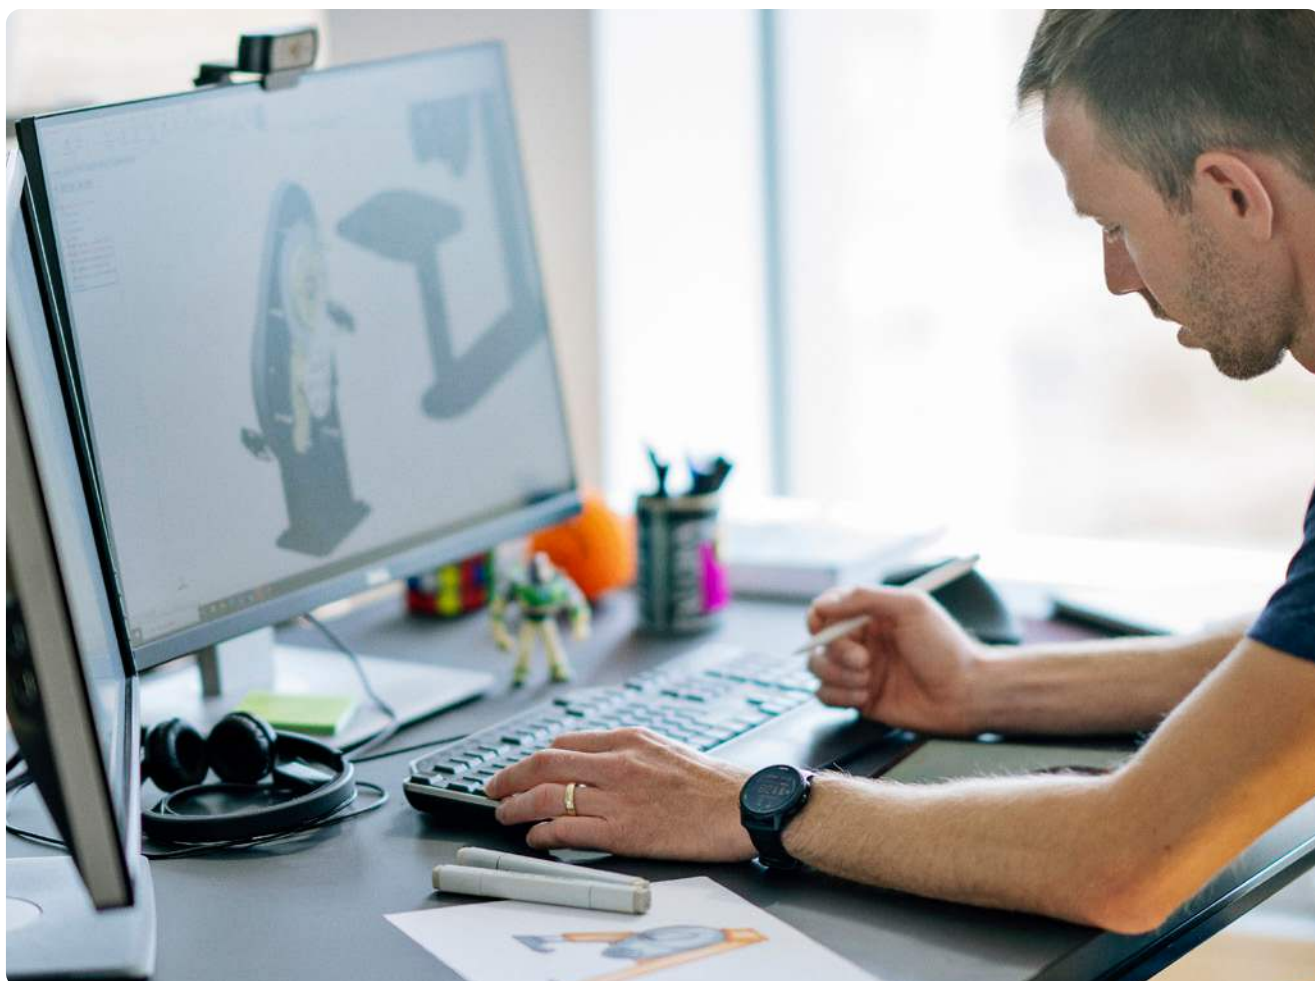

We approach playground planning by looking at the following factors:

- 1 Budget and funding**
- 2 Theme, design, and e desired aesthetic**
- 3 Users and target audience**
- 4 Purpose of the playground**
- 5 Zoning and range of play types**
- 6 Safety surfacing that matches the playground style**
- 7 Timeline and building**
- 8 Government regulations and safety**

Visit our website to download the Playground Planning Checklist and to learn more about fitness-site planning.

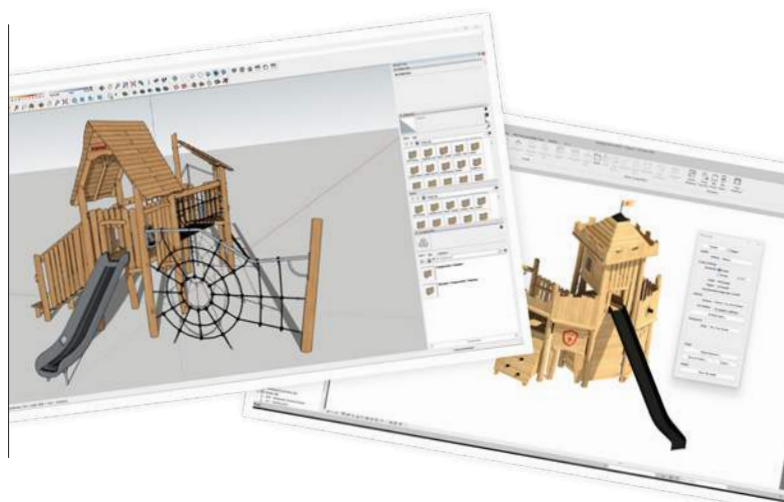

How to download playground design files

Once you have the fundamentals in place for your project, getting help to create your vision is easy.

For all of KOMPAN's products, we have an array of playground and fitness design files available to help you better decide on products and equipment and make the most of the space you are designing. Under each product, you'll find a product sheet, 2D files, 3D DWG models, CAD files, and 3D SketchUp drawings. You can also send us a request for tender specifications texts.

Visit our website to download and learn more

INSTALLATION AND AFTER SERVICE

KOMPAN installation teams worldwide have decades of experience in the playground and fitness-site industry

Our ISA department offers high-quality repair services and installation* for our customers as well as maintenance agreements to ensure playgrounds and fitness sites are installed and maintained to the highest standards. Over the last 50 years, we have worked with the public

and private sectors. It is, therefore, safe to assume that our professional installers have worked with virtually any playground or fitness equipment, landscape, and situation imaginable. There are different stages to installing a playground or fitness site:

* Please check your local or regional KOMPAN office for installation possibilities, as our ISA service offerings may vary from country to country.

Read more at kompan.com

1 Pre-installation site visit*

We start with a site visit to ensure the area is ready for installation. This includes checking access for trucks, earthmoving equipment, or cranes and clearing old surfacing or equipment. We'll also map underground utilities such as water, gas, power, and drainage and clear any roots, trees, or plants. Excess soil may also need removal, potentially affecting installation time and cost.

* Please process local permits before installation, as approval times vary by region.

2 Installation process

Our professional installation covers project supervision, safety surfacing, landscaping, and assembly. For safety, all equipment must be installed by trained experts following local regulations and KOMPAN's strict guidelines.

3 Post-installation inspection

After installation, we conduct a full inspection to confirm every detail meets safety standards. KOMPAN also offers inspection services for playgrounds built by third parties.

INSPECTION PROGRAMS

An inspection program is an agreement with us to maintain your dynamic fitness equipment or playground equipment after installation*. We carry out minor repairs and keep you informed about the condition of your equipment. Prioritizing an inspection program ensures your

dynamic fitness and playground equipment lasts longer and functions better. Regular inspections help address minor issues before they become costly problems, reducing worry, downtime, and unexpected costs.

* Please check your local or regional KOMPAN office for after-service possibilities, as our ISA service offerings may vary from country to country.

Read more at [kompan.com](https://www.kompan.com)

1 Inspection services

KOMPAN offers four types of inspections, whether your playground or fitness site is installed by us or a third party:

- Safety inspection
- Functional inspection
- Visual inspection
- Delivery inspection

You can always contact us for a tailored quote on an inspection agreement.

2 Service and maintenance

We provide regular maintenance to extend the life of your KOMPAN equipment, including:

- Tightening loose fasteners
- Replacing broken or worn parts
- Levelling and replenishing surfaces

Our Expert Maintenance Agreements cover all brands serviced by KOMPAN-certified technicians. For those managing repairs in-house, our Repairs in Own Management agreements offer parts and support for a seamless process.

3 After sales

To keep your playground and fitness site safe and functional, we offer various service and repair agreements. Regular inspections are recommended, even though our equipment is built to last.

We offer:

- Functional inspection (three year recommended)
- Safety inspection (one year recommended)
- Repair readiness

MAKE YOUR SPECIAL PLACE COME TRUE

Across the world, communities and companies want to create landmark locations that bring children, adults, and communities together and function as great destinations for visitors.

At KOMPAN Design Studio, we understand that our focus on WOW, STAY, and DEVELOP is essential when designing and building landmark playgrounds.

The location must be beautiful, but it must also be fun and challenging. We do this by utilizing our unique architectural and engineering experience in collaboration with knowledge from the KOMPAN Play Institute and KOMPAN Fitness Institute. Playgrounds that children and adults want to stay at, come back to — again and again — and talk about as great destinations to visit.

TAILOR-MADE

Understanding your dream: A school may want a play sculpture that symbolizes wisdom and learning. A local community may want their play sculpture to tell a story about the community, connecting one generation to the next. Whether you are looking for a customized playground or fitness site, the process looks like this:

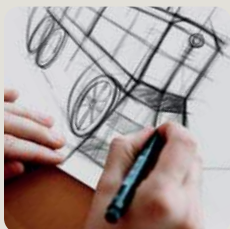

1 Finding the perfect concept

Together we find the perfect concept for your story. For example, we can conceptualize a train station for a station town or a municipality that wants to signal something with train transportation.

2 Researching the concept

Next, the design team will study the phenomena in order to find the features that visualize your story the right way. For train transportation, a freight train could be key.

3 Sketching design ideas

The first sketches are made and delivered to you in order to test ideas and find the perfect design for you.

4 Loaded with play and activity

Your play sculpture is loaded with the portfolio of play features that we have invented throughout half a century.

5 Building the sculpture

Our engineers make sure that the static structure is safe and sound. We use the highest quality materials in order to build a landmark that lasts for decades.

6 The final structure

Based on the initial idea, created by skilled designers, engineers, and craftsmen, the final play structure is now ready for children to come and play at for hours and hours.

Taylor Farm Park
Sandston, Virginia USA

North Bend Elementary School
Houston, Texas USA

TURNING THEMES, IDEAS, AND STORIES INTO PLAY LANDMARKS

For more than a decade, we have built tailor-made and highly unique destination playgrounds that WOW, inviting both children and adults to come and play. They come in all kinds of themes and can be customized to your local community, or to fit a specific environment. Always loaded with the play activities we have developed over half a century.

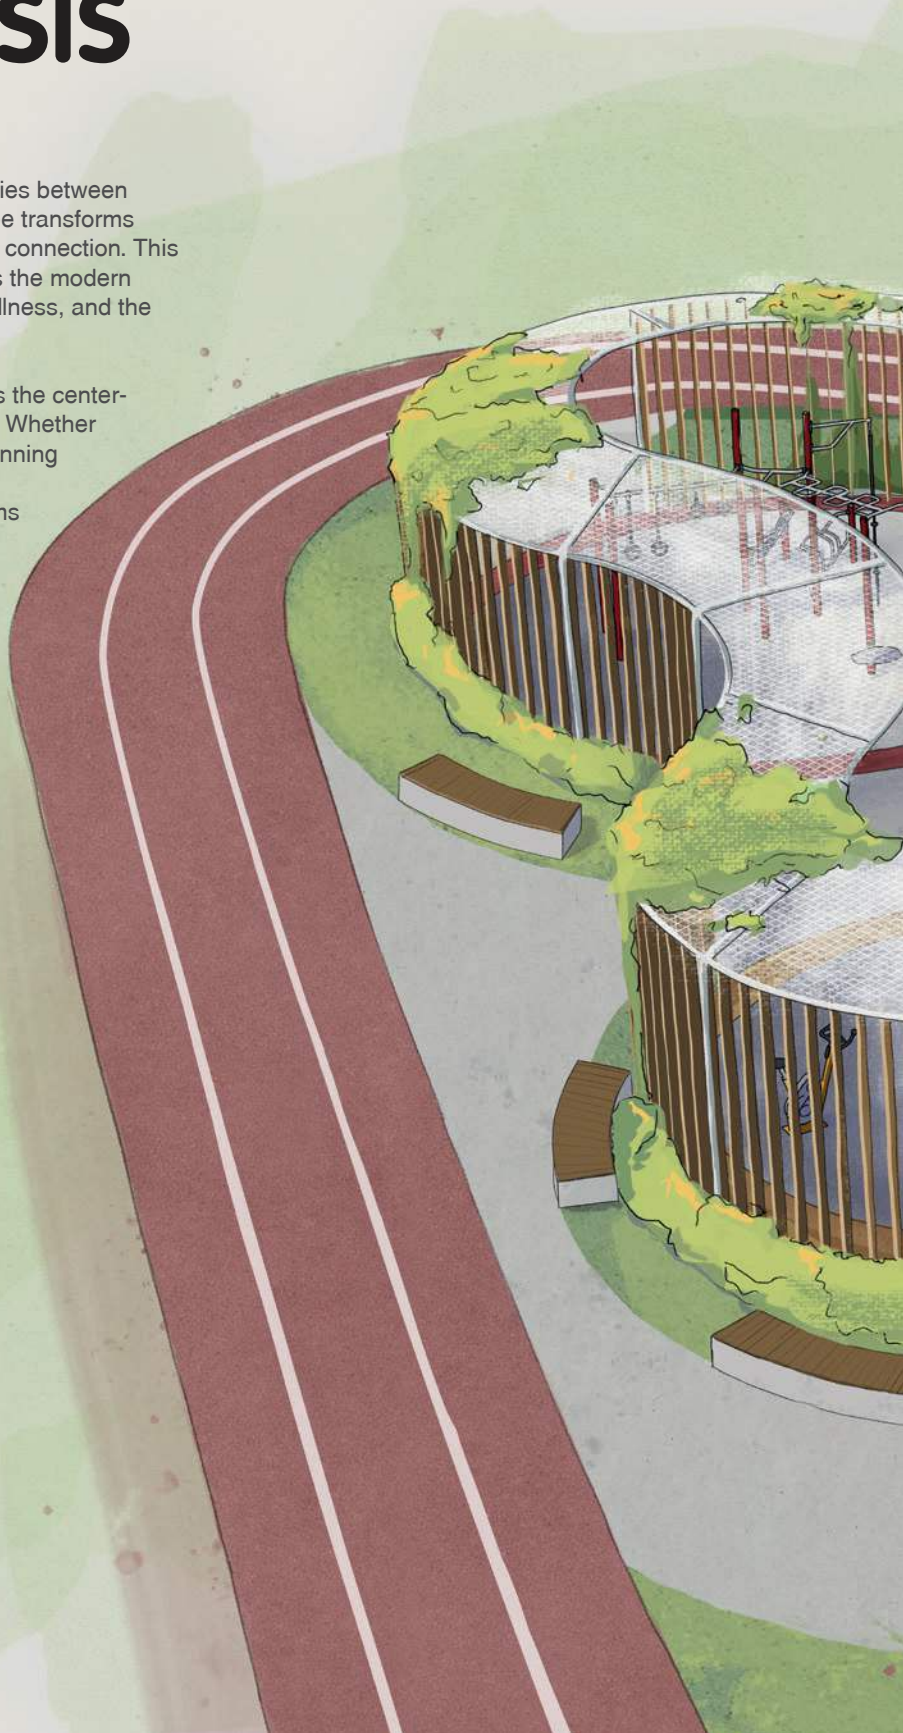

The structures are made of highly durable and vandalism-resistant materials that make them last for decades to come. Also, they are safe and certifiable like all the products that we have built over the past 50 years.

SPACE CREATION: A VISIONARY FITNESS OASIS

Imagine stepping into a world where the boundaries between fitness and nature blur, where the urban landscape transforms into a sanctuary for movement, mindfulness, and connection. This concept: the sculpture, Space Creation, redefines the modern fitness experience — integrating architecture, wellness, and the outdoors into a seamless flow.

At its heart, an elevated platform that emerges as the centerpiece, effortlessly facilitating a range of activities. Whether it's morning yoga as the sun rises, an intense spinning session, strength training, or simply a communal hangout space, this platform adapts to the rhythms of the day.

This space is more than just a fitness area; it allows connection, movement, and serenity within the urban landscape. It's a holistic approach to creating fitness for all.

Space Creation focuses on zoning for yoga, spinning, strength training, or casual hangouts. The surfaces vary from concrete to artificial grass, FLEXOTOP™ ECO or wood, offering flexibility and comfort.

A multifunctional wall frames the space as zoning for strength training, cardio, or functional training. The back side of the wall acts as a divider, providing privacy with solid or open structure options.

Stairs offer tiered seating and access to the platform, which is ideal for socializing or resting. Elegant posts support ambient lighting and shading, creating a tranquil and intimate atmosphere.

Ice cream cart
The details of this ice cream cart are amazing and the narrative is evident. With built-in containers for ice cream and toppings and a counter drawer, the intention is clear. A customizable cart sign is the cherry on top.

TALES FROM THE KOMPAN TOWN

Home to play, fun, and laughter

This year, we introduce a town-themed playground concept that ignites children’s imaginations through role-play and storytelling.

The MOMENTS™ playground concept is structured like a miniature town with key landmarks such as a fire station and truck, a charming townhouse with a café, a famous ice cream cart, and a big hangout tree with a hideaway.

Each structure is intricately designed with familiar details, story prompts, and a bright color palette that draws children into a vibrant world of themed play.

KOMPAN’s new concept inspires children to create, explore, and connect meaningfully by combining a town’s familiar setting with the limitless possibilities of role play.

Fire station with built-in fire engine
 Play revolves around the command-and-control room near the fire engine so everyone can stick together when the alarm bell goes off.

A real café — latte, tea, or lemonade
 At the KOMPAN café, enjoy refreshments on the rooftop terrace or outside on the patio.

Surfacing enhances the play value

The KOMPAN town theme comes to life with supporting themed surfacing. Children love to create their own stories and we enjoy jump-starting their play creativity with numerous ways to explore. The town comes to life — from the little lake with the big tree house to the fire station.

NEW

Easy access to elevated play activities
Easy-access staircase to the structure's elevated play activities ensures play for all.

Details ensure durability

We've improved the structural integrity by treating the wood with colored oil and protective coatings, which extend its durability and lifespan.

A WOODEN WONDER

New material and features — the same play activities

We are excited to introduce our MOMENTS™ range, now crafted in beautiful pinewood*. This new offering brings the nostalgic charm of a backyard treehouse to public playgrounds, blending traditional treetop houses' imperfect, self-built feel with modern design.

The use of pinewood not only provides a natural, inviting aesthetic but also ensures durability for endless playtime adventures. Our MOMENTS™ range in pinewood invites pre-schoolers and school-age children to explore, dream, and play in a world reminiscent of treehouse adventures.

Designed to blend perfectly with the entire MOMENTS™ range and offer great flexibility, the new MOMENTS™ wood concept is a great choice for kindergartens and schools.

* Pinewood is not available for selected areas of the world with hot and humid climates.

A new wood concept

The design aims to evoke the feeling of being in small, cute wooden huts connected by "transparent" links, emphasizing the treehouse feel. The new pinewood concept is made of FSC®-certified wood. (FSC® C004450)

Strength and resistance combined

Our Corocord ropes are designed for optimal strength, abrasion resistance, and all-weather durability. These ropes are made to withstand vandalism, ensuring longevity and safety in various environments. The ropes are tightly wrapped with tempered EcoYarn™, which is melted onto each strand using over 95% post-consumer recycled material.

FUTURE-PROOF PLAY POSSIBILITIES

Corocord™ Spacenet™ — the continuation of a proud concept story

A rope playground is the perfect blend of fun and development benefits. This year, we have increased our Spacenets™ flexibility options to enhance customization and future-proof our rope playground concept. This makes our Spacenets™ the perfect choice for children to explore and grow, but it also enables detailed customization to your specific needs or concept ideas.

Our brand-new membrane connector enables on-site membrane assembly, giving you a great deal of design freedom when adapting the Spacenet™ structure to the landscape and existing playground features or when designing a site from scratch.

Unlimited flexibility — interlinking options

With six pre-defined color concepts and numerous add-in and add-on options, you can create bespoke Spacenets™ structures. A new platform enables interlinking with our other popular product categories, such as MOMENTS™, ELEMENTS™ and Robinia.

On-site customization

The membrane connector in high quality steel is in alignment with other Corocord™ parts, enabling great flexibility and on-site customization.

Reach the target

The yellow target ball at the top enables multiple options for intriguing games, benchmarking, and a sense of achievement. The top goal ball is just one of many new add-on options.

NEW

Inclusive: sensory play variation on both sides, in two heights

Sensory play in two heights fosters an inclusive environment where children of all ages, abilities, and heights can explore and experience, individually, or with friends. This makes for a wide and inclusive user experience in parks, housing, or educational settings where supporting diverse needs is a priority.

UNFOLD SENSORY PLAY WITH PLAY PANELS

New elevated play panels — making play activities even more welcoming for all

Children develop essential human skills in play as they follow their innate desires: curiosity, creativity, and community. With KOMPAN's range of playground play panels, you can enhance play experiences by giving children the opportunity for exploration and individual play, also in small playgrounds. Our activity panels are designed specifically for toddlers, kindergartners, and primary school-agers, guiding

them toward key areas of development as they engage in fun, voluntary play. This year's new play panels focus on sensory stimuli and multi-layered challenges. Available in two different heights, our play panels are designed and tested with users to accommodate children of all ages and all abilities, including those who require wheelchairs to move around.

Make-and-trade panel

While engaging in explorative play, children experience cooperation, problem-solving, and tactile stimuli, training their fine motor skills and creativity. This sand-and-water play panel inspires explorative, sensory play and often spurs dramatic play scenarios such as playing shop. This stimulates children's communication and language skills, as their imagination takes them anywhere they can imagine.

Turnable maze — a sensory wonder

With multi-layered challenges, the turnable maze caters to a large age span. A more complex maze challenge on one side and a more simplified maze on the other offer individual play and group play activities for different skill sets.

Accessible for all ages and abilities

To accommodate a broad range of age groups and user scenarios, including those with assistive devices or wheelchairs, we have designed and tested two different heights: a lower level for younger users and a higher play panel for older users or those using wheelchairs.

NEW

Cardio for all
This range invites all types of people and abilities to have a great workout and increase their heart rates — all in the name of creating healthier and happier communities.

Smooth resistance selector mechanism

The resistance adjustment handle is integrated into the cover, which is made of vandalism-proof polycarbonate. This allows for easy adjustment and simple mechanics. This design provides ease-of-use and maximum robustness.

Arm Bike — embrace accessibility

Featuring a low seat position, wheelchair access, dual-side resistance adjustment, and ergonomic handle, the cardio Arm Bike is a compact but effective workout for all abilities.

Recumbent Bike

The ample space between the cover unit and the seat allows for easy access and the backrest is easily adjusted when seated. The wide Ecogrip seat and adjustable backrest ensure a steady workout for people of all sizes.

FITNESS ESSENTIALS MADE FOR THE OUTDOORS

High-quality, adjustable cardio equipment for all

Our Essential Cardio range is designed to give users of all ages and abilities the perfect cardiovascular workout. These cardio machines are intuitive and straightforward to use and resistance can be adjusted just by turning a handle. This means that users of all fitness levels will get a safe and effective workout every

time. The magnetic brake system is low-noise, extremely durable, and provides a smooth exercise experience. This cardio range covers all user needs, providing workouts as good as the best indoor fitness site — or maybe even better!

NEW

Super Combis — Supervised

Super Combis with third-party options such as the battle rope, boxing bag, and barbell are intended for supervised or gated areas only, as these structures do not satisfy safety standards for public spaces.*

OUTDOOR FITNESS MULTI-STATIONS

Multiple strength exercises all-in-one

KOMPAN is proud to introduce our new range of functional training stations: Super Combis. In a compact design, the Super Combis offer a large variety of exercises targeting all muscle groups and skill levels. Each Super Combi has a perfect mix of fun, easy-to-use, and more challenging items. A great example is the integrated universal parallel bars that encourage creative workouts and are accessible for wheelchair users. We also have rings, step platforms, and climbing ropes. Items that are

fun to use and can be used by everyone. The Super Combis have multiple configuration options and are designed to maximize functionality in a small footprint. This makes them the ideal solution for schools, public parks, and recreational spaces looking to offer diverse and inclusive fitness opportunities.*

* The Super Combi supervised structures are intended for gated areas only as they include items that do not satisfy safety standards for public spaces. Loose items are not included in the Super Combi supervised products.

STRENGTH EXERCISE FOR ALL
 Static Rings in two different heights enable upper-body workouts for wheelchair users.

One structure — multiple exercise types
 Key features include step platforms for leg strength and cardio, rings for upper-body workouts and stretching, and a rope for accessible rope climbing.

BE INSPIRED

Browse the following pages to be inspired on how to plan a playground with play activities, intergenerational play, age-appropriate play and play zones.

INCLUSIVE FOR ALL

PLAY SOLUTION

The amazing, thrilling playscape attracts all ages and abilities with its richly varied, responsive play choice. The varied playground areas support both wild and quiet play types and behaviors for young as well as older children and tweens.

Several playground zones with break areas invite long stays. KOMPAN's six universal design principles guide a playscape, inspiring children of all abilities to play and come back.

TODDLER'S PARADISE

PLAY SOLUTION

The Toddler's Paradise is a safe world of play for toddlers. Shown here in a classic courtyard, it would also suit a kindergarten, a park, or a public square. The playful themes and colors invite children to play. The play equipment is placed on different sides of the "river", which adds extra play stories.

The variation of play equipment provides multiple ways of playing. The playground makes space for social play, role-play, and the opportunity to play alone.

SPACE TRAVEL

PLAY SOLUTION

To be an astronaut, one has to be in excellent physical condition. The Space Travel theme calls upon children to be physically active, spin on the planets, climb structures, and jump from star to star. The Space Travel playground also inspires conversations about space, the physics, gravity, etc. As the majority of play takes place at ground level, or close to ground level, children with disabilities can be part of the play.

The many different activities in this design will make this playground an active place to play. Not only can it activate many children at the same time, but the many social and physical challenges will also keep them active for a long time.

MINI MONKEYS

PLAY SOLUTION

On this playground, little adventurers can embark on a journey of fun and exploration. It is a wonderland for smaller children, offering an array of engaging activities that spark joy and encourage active play. With gentle slopes to conquer, thrilling slides to whisk down in glee and imaginative springers that bounce to the rhythm of laughter - every corner promises new delights.

Here, mini monkeys, like tiny climbers, can safely scale new heights and navigate through intriguing trails that challenge yet inspire confidence in their

growing abilities. The playground also features benches and meeting points where kids can gather and share their adventures.

GOLD RUSH

PLAY SOLUTION

The old gold mine from the past is still standing. The natural wood material makes for a nice contrast in an urban environment. This theme fits into many different contexts.

The varied areas, play equipment, and surfaces invite different activity levels and play scenarios. This makes the playground appealing to children of varying age groups. Dig in the sand and rinse the sand away in the water to find small gold pieces. Edges and sitting areas provide parents and grandparents the opportunity to be part of the activity.

The Gold Rush theme will inspire children for dramatic play, which stimulates language development and social interaction. The playground is inclusive for children of all abilities.

WILD JUNGLE

PLAY SOLUTION

The Wild Jungle is designed for a natural atmosphere. The gentle, wooden look allows this play design to fit into and enhance any natural setting or even help bring a natural feel into an urban environment. The jungle theme inspires children's natural instinct to play.

The versatile play options keep children occupied for hours on end. While the children play and have fun, their skill sets develop from the many different types of play — physical, social, and cognitive. The children

train their sense of balance, cross-coordination, and social-emotional skills while having fun. Many of the activities and the playground layout include children from 2 to 12 years and of all abilities.

KOMPAN SITE PLANNER AND PRODUCT CONFIGURATOR

For instant 3D and photorealistic renderings

Creating the perfect playground or fitness site is more than just a project — it's about bringing your vision to life. The KOMPAN Site Planner tool is designed to make this process seamless, collaborative, and incredibly efficient.

Imagine being able to see your ideas come to life in real time. Our Site Planner tool can do just that. This powerful tool allows you to sit down with your KOMPAN sales representative and design your playground or fitness site on the spot at your location. The sales representative works closely with you, offering expert advice and recommendations throughout the design process.

Within moments, your concepts are transformed into stunning 3D and photorealistic renderings. This means you can visualize every detail of your project instantly, making adjustments and improvements on the fly. No more waiting for sketches or revisions — your dream project unfolds right before your eyes.

The Product Configurator tool allows you to experiment with different layouts, colors, and features of the products placed on the site.

From vibrant playgrounds that spark children's imaginations to dynamic fitness sites that promote health and wellness, our tools make it easy to design spaces that inspire and engage.

Ready to bring your ideas to life? Contact us and let's work together to make your vision a reality.

MOMENTS™ COUNTRYSIDE

Harvesting Fun

Play is about preparing for life and reaches its strongest potential in inspiring young imaginations through the imitation of reality. Farm-themed playground equipment opens the door to adventures that would otherwise be “off limits”.

The thrill of climbing on a giant tractor triggers real-life scenarios on the farm, where the barn is stocked, not with hay, but with stacks of endless fun.

TODDLER MULTIPLAY

Colorful Play for Toddlers

Playing is how toddlers learn about the world around them. They practice new skills, explore their imagination, and make new friends. Familiar themes create playful conversations and the elevated playhouses provide a physical climbing challenge with an area underneath for a play break.

Toddlers can safely explore and find their place in the world playing on a Multiplay structure.

GIANTS

Taking the Element of WOW to New Heights!

The towering Giants come at a staggering height of 22 to 30 feet. A small footprint does not mean fewer play activities — quite the opposite. Filled with physical and cognitive play activities from top to bottom, inside and out, they are designed to WOW and challenge school-aged children.

The thrilling slide and themed exterior add to the excitement as Giants entice children to challenge and explore heights that wow!

Equity in play and ramped solutions

For some play solutions, ramps are the best way to provide usability and accessibility for children or caregivers with different abilities. KOMPAN GIANTS ramp solutions are modular and can be accessed from ground level and up, or from an elevated level, utilizing the other landscape features to ease access.

Contact us for more information and let us help you create an exciting ramp solution and inclusive play environment.

MOMENTS™ HERCULES

Pre-school play fit for inner cities

MOMENTS™ HERCULES is a rock-solid and fun play experience for pre-school children. The materials used in this product line are carefully selected to provide a long lifespan and are highly vandalism-resistant, making this solution ideal for a city's unsupervised areas.

The play activities within MOMENTS™ HERCULES pre-school stimulate the pre-schooler's instinct to play through a range of traditional play activities, like sliding, gliding, climbing, and the exploration of cognitive elements.

The many ground-level activities and low entry points of the structures make MOMENTS™ HERCULES highly inclusive ensuring play for all users.

KOMPAN RAMP SOLUTIONS

Play solutions for all

To create equity in public play is a main obligation of our communities. This implies equal access to playgrounds for all citizens, including children or parents with differing abilities. For some playgrounds, ramps are the best solution to provide accessibility and usability.

KOMPAN ramp solutions let children and adults in wheelchairs participate in play by giving them a free pathway into and around in the play structure.

Along the path, they find interactive play activities placed at an appropriate height before finishing off at the top of the structure with a rare view from above. The path through and around the ramp structure is paved with joyful and educational play activities for children of all abilities

Elements GO
PCE610431

Standard ramp solutions

ELEMENTS™ integrated ramp system. High play value and very high level of physical play for all age groups. See page 128-133 for more product information.

Hercules Preschool
PCX3002

A loop of play

KOMPAN ramp solutions offer a wide variety of gross and fine motor play events that can be used from inside and outside of the structure. There is a rich range of auditory and manipulative play elements. The play can take place in and on the ramped structure as well as outside of the structure, welcoming all users.

The layout of the ramp structure generates a loop of play, allowing for access to the elevated platform through a ramp as well as an inclined boarding net that allows several users to access at the same time.

KOMPAN SHADING SOLUTIONS

Children should be able to play even on the hottest day

When playing outdoors on sunny days, children need protection from the harmful rays of the sun.

A KOMPAN shading solution is an easy and secure way to get just that. Integrated sails provide large shaded areas that slowly move over the play structures and surrounding areas. By reducing intense heat from direct sunlight, children are safe from heat exhaustion and can happily play longer.

Shade material

Sails are manufactured from Commercial 95 High Density Polyethylene (HDPE), a knitted shade cloth manufactured solely for tensioned sunshade structures.

The material is treated with UV-stabilizers to give it lasting durability even in direct sunlight. KOMPAN shades will not rot or fray, and the high quality lock-stitch construction gives superior tear strength. The shade sails are only constructed from commercial grade knitted shade-cloth with up to 96% UV block.

In light rain, the water will run off to the lowest point, but the water will drain through the fiber in a heavier downpour.

Open integrated shading

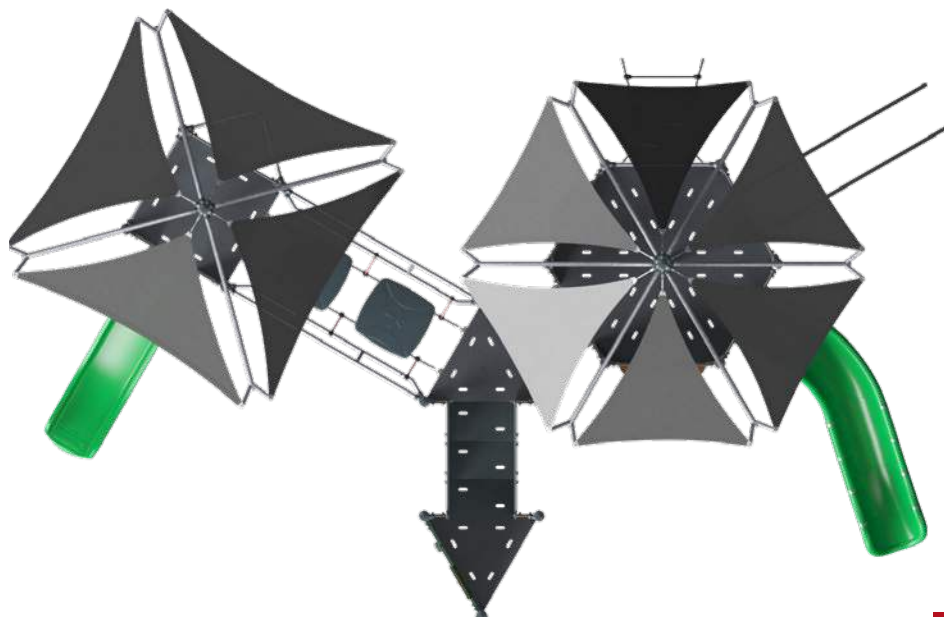

Shade solutions consisting of four or six individual sails placed in different layers are available for the large square deck and the Mega Deck platform for Moments™ and Elements™ play systems.

Choose between
6 different colors:

TOP VIEW

Square sail
~86 ft²

Hexagonal sail
~108 ft²

Closed integrated shading

These integrated shades are available for all deck shapes and sizes within Moments™ and Elements™ play systems.

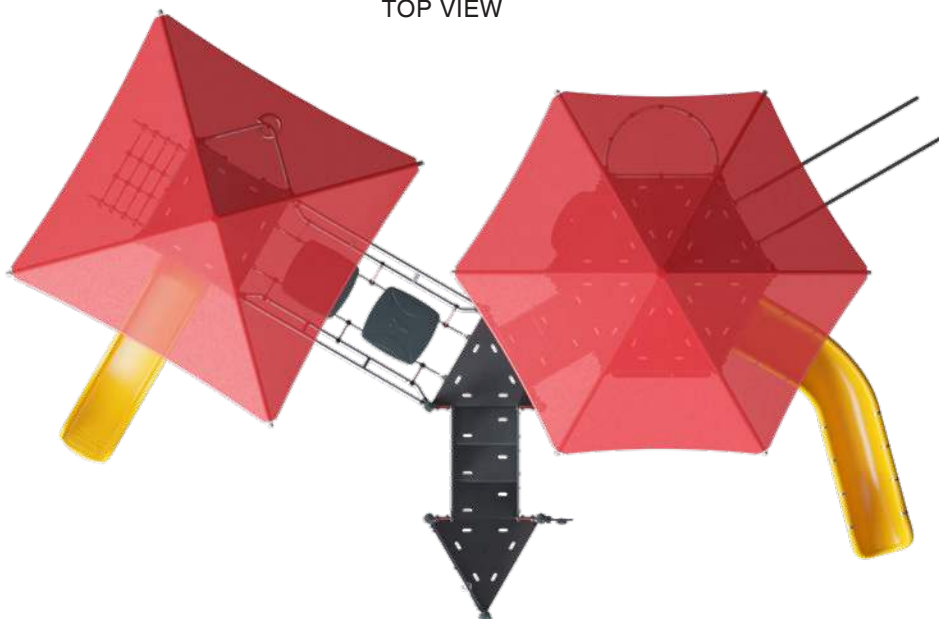

Uniquely designed shade system offers easy take down in case of heavy winds.

Choose between

TOP VIEW

Square sail
~97 ft²

Hexagonal sail
~124 ft²

ELEMENTS™ GROW

Agile and Exploratory Play

Elements™ Grow is a world of agile and exploratory play activities that enhance children's holistic development. Playing on these structures, children face age-appropriate physical challenges that gently push their boundaries and help them grow.

The physical challenges develop the child's motor skills, helping the child become self-confident when playing with friends and exploring the world.

See options on the FLEXIBILITY page.

ELEMENTS™ GO

Free Play with No Instructions

Elements™ Go is a series inspired by children and their innovative and creative approach to play. Observing how they climb on the exterior surfaces of regular post-and-platform playgrounds in search of new challenges inspired us to create structures to enhance this curiosity.

Children are inherently curious and masters of innovation. Thankfully, playgrounds don't come with play instructions.

See options on the FLEXIBILITY page.

GALAXY™

A Modern Playground for Tweens and Teens

Teens and tweens like to play and hang out in playgrounds. Therefore, we developed a series of equipment for older children as a crossover between playgrounds and fitness sites.

Galaxy™ was the world's first solution to move away from the traditional post-and-platform and play-tower designs. It also became the first free-play design to include all children regardless of abilities.

See options on the FLEXIBILITY page.

BLOQX™

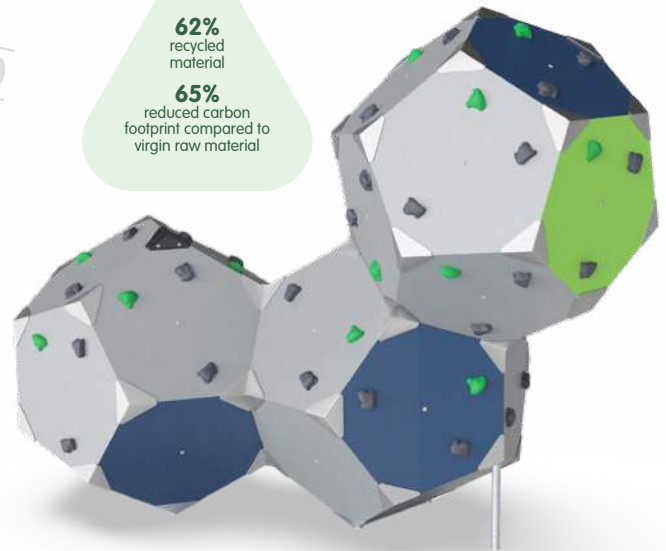

A Fun, Simple, Scalable System

Bloqx™ offers a unique and intense climbing experience. Sometimes exhausting — even for tweens and teens! That’s why the design accommodates rewarding hang-out spots on the upper surface of the pentagon shapes.

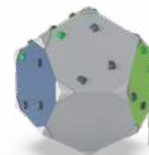

The Bloqx™ design is a favored selfie platform, which tells us that Bloqx™ has made its mark with the target group: Tweens and teenagers. That’s pretty cool.

FREESTANDING PLAY EQUIPMENT

SUPERNOVA, CAROUSELS & SPINNERS

Spinning with Joy

Children need the dizzying input that comes from spinning. These important movement experiences help the child's nervous system mature and organize. Besides being great fun, the spinners and carousels also help children train their sense of balance.

Our innovative spinners and carousels attract children of all ages and abilities and the best part is: They LOVE it!

BALANCING AND CLIMBING

So Simple, Yet so Important

A somersault bar, stepping pod, or climbing net may not look like much, but through fun play, they contribute to childhood development. Rotating trains the child's sense of space, climbing trains the child's cross-coordination skills, and jumping trains the child's agility and balance.

All these motor skills are vital to navigating the world confidently, for instance, when judging distances in traffic.

SPRINGERS

KOMPAN Invented a New Way of Rocking, and We've Been Rocking the World Since 1970

This is where it all began: A red hen on a bright blue spring. The Crazy Hen was the world's first play design to deliver a fun and more functional alternative to the traditional seesaw. Today, the iconic shape is recognizable worldwide.

Every playground springer is just waiting for a child to unlock their creative potential. And you don't need a second user — or a counterweight — to get rocking!

SEESAWS

The Fun Thrill of Rocking

Seesaws add a social dimension to the joy of rocking. Rocking on a seesaw trains children's muscles, motor skills, balance, and coordination. The spacious design and sturdy back and foot supports allow children of all abilities to play together.

The fun thrill of rocking will make children return for more. There is nothing better than rocking with a friend — or two!

SAND & WATER PLAY

A Vital Part of a Child's Creative and Cognitive Development

Playing with sand and water has a substantial developmental impact on a child. For example, building structures in the sand fosters a feeling of accomplishment in the child and sparks their creative thinking. Sand and water stations also encourage children to play together.

Our sand and water stations come in many shapes and sizes with an appealing look that awakens the curiosity in children.

PLAYHOUSES AND THEMED PLAY

Familiar, Child-Sized Spaces in a Big World

The smaller-scale open playhouses are a strong play motivator for the youngest. The openness of the play space allows many children to play together from the inside and the outside. It's the first stage of forming a community.

From the Villa to the Allotment, themed playground playhouses open doors to understanding the value of friendship and imaginative play.

TODDLER PLAY EQUIPMENT

A Stimulated Toddler is a Happy Toddler

The happiest toddlers are those who experience age-appropriate stimulation and challenges. The playful designs in our Toddler Equipment collection draw on familiar connotations and invite children to engage in dramatic, developmental play.

Whether climbing the tallest giraffe or driving a pretend car, our toddler universe gently stimulates and guides the little ones to understand the world around them.

TODDLER STATIONS

Themed Play Stations for Play and Learning

Toddler stations mimic real-life environments and appeal to infant and toddler curiosity: lots of details to explore and play at eye level. Play panels stimulate their creative and cognitive skills and provide the opportunity to play from all sides.

The toddler stations are placed on top of the surface without fixation to the ground, making it a movable, flexible solution for indoor or outdoor use.

PLAY PANELS

That Little Extra Fun for Play and Learning

In free play, children learn by following their instincts, developing fundamental human skills. Adding play panels to your playground structure creates a learning dimension to the play experience. Through music and themed play panels, children learn about different topics.

And yes, adults can join the play and guide the children to learn new things while having fun, too.

EMBANKMENT SLIDES & ROPES

Slide, climb, repeat!

Enjoy the fun of an embankment slide as you share the thrills with your friends, zooming down the same hill and climbing back up over and over again. Hill Climbers perfectly supplement embankment slides: available in different lengths, you can find the perfect fit for your hill slopes, whether a gentle 20° or a more daring 60°.

Start cheering and let the sliding, climbing fun, and belly-laughing begin!

ZIPLINES

The King of Fun, Thrill, and Action

The line for the cableway is always long! Whether you're four or twelve, the cableway is just great fun. Besides being fun, the cableway teaches children several important lessons and skills. They learn to wait their turn and hand over the seat to the next in line.

All across schools and parks, one look at all the children lined up for playground cableways, and you can understand why. What a ride!

MEETING POINTS

Comfortable Hangout Spots

As children grow older, they become more interested in social play and interaction. Comfortable meeting points should be available in any school playground. Our Meeting Point solutions cater to small and large impromptu social gatherings and offer a place to relax.

Meeting Points are comfortable hang-out spots for a chat or a break, whether on the swaying hammock or the bench.

SIGNS

Customizable Signage

Signs are an essential way to make relevant information available for the users of private or public areas. E.g., general or practical information or instructions about the use of a playground, opening hours, ideal user or age groups, sponsors, or contact information.

Our customizable signage is flexible regarding text, signs, and symbols, enabling you to deliver the right message.

PORTAL SWINGS

Swings Children Keep Coming Back To

Of all play activities, swinging is a favorite. Apart from being great fun, swinging trains children's agility, balance, coordination, and spatial awareness. These motor skills are crucial to judging distances and navigating traffic safely.

Whether it's for a quiet moment alone or swinging with a group of friends, children love to swing.

See options on the FLEXIBILITY page.

SWING SEATS

A Swing for Every Need and Ability

We want everyone to enjoy the thrill of swinging. Our wide range of swings cater to various abilities and age groups. We offer everything from a baby swing seat to a five-way swing solution and an inclusive swing seat.

The Bird's Nest is popular with tweens and the You & Me Swing is perfect for sharing the swinging experience with caregivers.

UNIQUE SWINGS

Swinging Together — the More, the Merrier!

Not only is swinging the most popular activity for playful children, but swinging together is an irresistible invitation for all children to play - and simultaneously train vital skills. The social-emotional effect of swinging together cannot be overestimated.

The soothing or wild swing movements create a joyous thrill, laughter, or relaxation, whether swinging together or alone.

CLASSIC SWINGS

The Classic Swing Never Grows Old

To swing is a classic play activity, as is the design of KOMPAN's classic swings. The traditional look makes it the preferred design in many playground settings. You can construct your swing solution from our wide range of swing seats with as many sections as possible.

The standard swing and baby seats can include anti-wrap clamps to prevent the chains from turning.

See options on the FLEXIBILITY page.

COROCORD™ LOOPS

Social Seating and Togetherness

Loop sculptures draw everyone's attention with their fascinating shapes and bright colors. These eye-catchers hold multiple loop play activities. While children slide, climb, balance, crawl, jump, or dangle, they practice essential skills in child development.

Corocord Loop structures are here to make playtime extraordinary, one thrilling adventure at a time!

COROCORD™ DYNAMICS

Furniture for Indoor and Outdoor Use

Rotating, swinging, and bouncing fun — hardly any child can resist the magnetic attraction of these dynamic products. The play structures deliver high-quality fun, drawing on the fundamental gravitational forces, while powerful movement experiences help the child's nervous system mature and organize.

Let the gravitational forces take you for a spin and enjoy a thrilling ride while giggles echo for miles.

COROCORD™ MINI DOMES

Crawl and Climb for the Little Ones

This Mini Dome is a wondrous climb-and-crawl structure for little explorers. With inviting resting points for socializing, gently bouncing climbs, and intriguing play panels, this small structure is big on play value for 2-to-5-year-olds.

Children can crawl to the top or play peekaboo at ground level beneath the structure. The abacus and mirror play panel ensure hours of exploration and play.

COROCORD™ SPACENET™

Three-Dimensional and Sky-High Play Activities

Very few play spaces incite children to move around in all directions as the Spacenet does. This sky-high playspace sparks their imagination as they venture into a thrilling three-dimensional universe. A Corocord Spacenet is superior for developing a child's cross-coordination and physical skills.

With a Spacenet, the horizon knows no limits, and the joy of exploration knows no bounds.

COROCORD™ MONKEY TRAILS

Get in Motion!

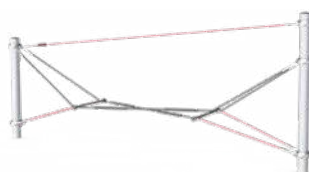

No other play equipment offers so many different opportunities to get in motion and use mind and body skills as the Corocord Monkey Trails do. Balancing, bouncing, climbing, spinning, and sliding are all possible activities. The children have to navigate and find ways through the complex rope-and-activity jungle.

Brace yourselves for a wild climb of endless possibilities to get body and mind in motion like never before.

COROCORD™ EARLY CLIMBING

Fun for the Little Climbers

Climbing is fun and an important skill for a child to master, especially in the younger years. When climbing, the child develops cross-coordination skills, stimulating the two hemispheres of the brain and ultimately helping the child learn to read.

Get on the climbing path! Even young, more insecure climbers can get a fun and developmental experience.

For a greener future

Post-consumer recycled materials:

Corocord™ Rope with EcoYarn™

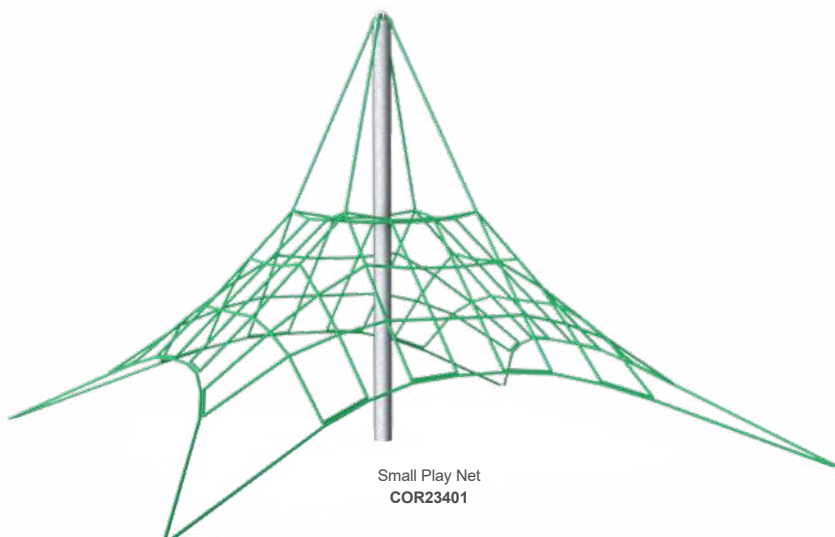

>95%

Steel parts adhere to industrial standards.

COROCORD™ PLAY BRIDGES

Bridging the Gap Between Play and Imagination

Imagine the sheer bravery it takes to keep stepping forward, suspended high in the air, peering down at the ground below. That's just thrilling! A trip across the bridge boosts the child's self-confidence and trains the child's spatial awareness.

Take the obvious route across the bridge, or explore an entire world of fun above and below, just waiting to be discovered.

COROCORD™ FRAME NETS

Enter the Realm of Three-Dimensional Play

Frame Nets are gateways to a vibrant, three-dimensional playground where kids rule the domain of fun and exploration. As children climb from one rope to another, a symphony of coordination unfolds their cross-coordination skills and enhances physical strength.

With every twist and turn, young minds ignite with the power of logic and problem-solving while unravelling mysteries on the way to the top.

NATURE PLAY

ROBINIA FANTASY

Escape to the Forest of Fantasy

In the enchanting realm of the fantasy universe, imagination and play intertwine. The quirky expression of the Robinia Fantasy play structures is unique and on nature's terms. The signature posts get their authentic woodgrain pattern from when they were forested in their natural state.

Climb towards the eternal battle between good and evil, or swing to escape the Warlock's magic spell.

See options on the FLEXIBILITY pages.

ROBINIA VILLAGE

It Takes a Village

The Robinia product portfolio is a collection of organic play structures with something for everyone - from enchanting playhouses designed for the youngest to large play structures for the oldest.

Robinia structures add a natural look to suburban landscapes or infuse an organic touch into bustling cityscapes. Whether you want your playground to stand out or blend in, Robinia is your answer.

See options on the FLEXIBILITY page.

ROBINIA PLAYHOUSES

A Cozy Play Space for the Youngest

House-themed playground equipment offers a sense of familiarity and comfort for the young. Combining the “house” concept and the incorporation of nature ignites their imagination and inspires hours of play.

In other words, Robinia Playhouses blend the benefits children get from exploring familiar concepts like “house” or “home” through play with the wonders of nature.

For a greener future

Robinia wood:

Nature's own material, harvested from European forestry. Robinia wood is known for its natural preservatives that make it long lasting in the outdoors.

ROBINIA CASTLES

Captivating Castle-Themed Play

A Robinia castle-themed play structure has creative play activities on all levels and floors. Its impressive size entices children of all ages to strategize how to defend or conquer the castle, helping them develop social and cognitive creative skills.

Prepare for action and adventures suitable for queens and kings and start making your way to the castle tower.

ROBINIA THEMED PLAY

Full Speed on Imagination

Play is about preparing for life. Themed play is most forceful in stimulating youthful imaginations when mimicking reality. Themed playground equipment opens the door to adventures that would otherwise be “off-limits.”

The thrill of flying the Propeller Plane or driving the Unitruck prompts real-life scenarios, where the imagination of going from one place to another brings endless fun.

SIGNS

Customizable Signage

Signs are an essential way to make relevant information available for the users of private or public areas. E.g., general or practical information or instructions about the use of a playground, opening hours, ideal user or age groups, sponsors, or contact information.

Our customizable signage is flexible regarding text, signs, and symbols, enabling you to deliver the right message.

ROBINIA SPRINGERS

Nothing Beats Rocking

A mother's gentle rocking is a soothing feeling. As children grow, rocking becomes a fun feeling. Rocking trains a child's sense of balance and spatial awareness — senses that help the child concentrate and navigate safely in traffic.

For younger children, rocking through their own effort or with a friend is the best feeling. Find your favorite bug-themed springer or seesaw and start buzzing.

ROBINIA DYNAMICS

Vital Tummy-Tickling Play Activities

The Robinia Dynamics portfolio entices children of all ages and abilities to come and experience the thrilling feeling of sliding, spinning, or swinging. Children need the sensation of butterflies in their stomach from spinning, sliding, and swinging to help their nervous system mature and organize.

Spinning, sliding, and swinging are vital in child development — the best part is that children love it!

ROBINIA ZIPLINES

The King of Fun, Thrill, and Action

The line for the cableway is always long! Whether you're four or twelve, cableways are incredibly fun and exciting. Cableways teach children several essential skills. Through interaction with each other when playing on the cableway, they learn to wait their turn and hand over the seat to the next in line.

A cableway is a thrilling playground asset that unites generations, abilities, and playful minds alike.

ROBINIA OBSTACLE COURSES

Climbing Challenge - Bring it On!

A Robinia climbing trail is a challenge that children of all ages and abilities will want to take on. Whether playing “the ground is lava” or other creative games, children train their balance and social-emotional skills and practice essential life skills without noticing.

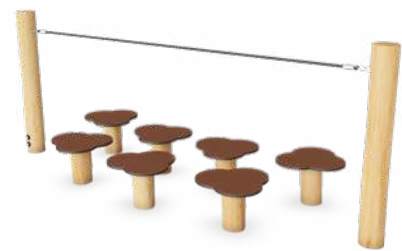

Balancing, swaying, and climb-and-crawl activities are immense fun and the accompanying challenge is embraced with enthusiasm!

ROBINIA BALANCING

Down-to-Earth Learning

Once children embark on a balancing trail, they develop essential life skills without noticing. Balancing helps train their eyesight and ability to concentrate. Two fundamental skills that both improve children's readiness for school and performance when going to school.

Watch out for crocodiles in the lagoon or get ready for a thrilling game of "the ground is lava."

ROBINIA CLIMBING

Challenging Climbing Structures

Remember the sense of achievement when conquering the giant tree in your neighborhood? Robinia climbing structures create that same wonderful experience! Making their path to the top, children cultivate self-confidence and develop cross-coordination skills that contribute to their reading development.

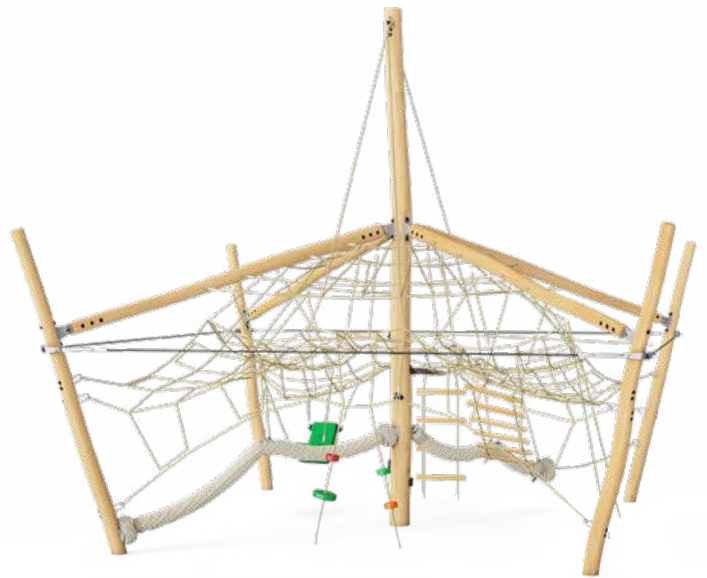

Children love to climb trees. Not because it's easy but because it's challenging.

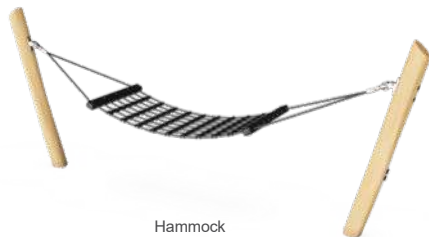

For a greener future

ROBINIA PLAY, ACT & LEARN

Add New Dimensions to Play

The Robinia Play, Act, & Learn range offers sensory, ground-based creative play for the youngest children. As an ultimate play starter, this range takes children through a creative play world with activities stimulating their cognitive and social skills.

Whether on the stage, drawing on the chalkboard, or playing on the music panels, the rhythm of play resonates with joy.

For a greener future

Robinia wood:

Nature's own material, harvested from European forestry. Robinia wood is known for its natural preservatives that make it long lasting in the outdoors.

ROBINIA PLAY PANELS

That Little Extra Fun for Play and Learning

Play panels for the youngest add a learning dimension to play as the panels help guide the child's learning towards specific topics. Children learn by drawing on the chalkboards and playing together on the music panels.

Watch them blossom as their skill set grows when participating in creative play with friends, caregivers, or independently.

ROBINIA SAND & WATER PLAY

Fun, Sensory, and Messy Play

We all know the sensory feeling of sand running through our fingers. Why? Because we've done it so many times as children. Constructing things in the sand gives children a sense of success. It stimulates their creativity while learning to take turns and observe how their peers' imaginations unfold.

Sand play is messy but so much fun! So kids, pull up your sleeves and start mixing sand and water.

For a greener future

ROBINIA SWINGS

Swinging — A Natural Joy

Of all play activities, swinging is a favorite. Swinging trains children's balance and coordination as well as their spatial awareness. These motor skills are crucial for judging distances, navigating traffic safely, and sitting still in school. Children also love to swing!

Whether it's a quiet moment swinging alone or wild play with friends on the Birds Nest swing, the sensation of swinging is unparalleled.

See options on the FLEXIBILITY page.

OUTDOOR FITNESS

SUPER GYM M

SOL202502

The Super Gym M package combines the very compact Super Combi 1 with an ab bench, lower back bench, cross trainer, and a bike. Both cardio machines feature adjustable resistance, making them adaptable to any fitness level. Whether you're a beginner or a seasoned athlete, this setup offers a well-rounded workout for everyone

SUPER GYM XL SUPERVISED

SOL202902

The Super Gym XL Supervised has the same great features as the standard Super Gym XL but also includes a barbell rack, boxing bag connector, and a battle rope connector. This package is intended only for supervised or gated areas, such as sports or fitness clubs, as some of the included items do not satisfy safety standards for public spaces

Minor regional deviations can occur due to differences in safety standards

SUPER GYM L

SOL202702

The Super Gym L is based on the Super Combi 3, which provides 360 degrees of activities in a square structure. It has a built-in workout challenge that starts with the overhead ladder, moves through the turbo wheels, and ends with the snake bar. Additionally, this unit has a low bar, incline press, target shoot, climbing ropes, rings, and jumping platforms. Compared to the number of activities, the Super Gym L's footprint is minimal, allowing it to fit in compact areas. It can be used for school PE classes, group training, and many other types of structured workouts.

QUICK FITNESS M

SOL202102

The Quick Fitness M package is a compact fitness site, perfect for rest stops and similar locations. It offers everything needed to counter the effects of long hours behind the wheel: cardio, abs, lower back, and plenty of strength and stretching opportunities. With a complete set of equipment and a space-saving design, this package is ideal for travelers looking to stay active on the go.

CIRCUIT 6

SOL200502

High-quality training in a compact space. This space-efficient circuit training site, equipped with premium cardio and strength equipment, appeals to a wide variety of users. Given its small footprint and the growing popularity of circuit training, this site is perfect for small communities or parks.

ACTIVE AGERS S

SOL200102

Accessible fitness for seniors. Active Agers S is a compact solution designed specifically for older adults. Featuring cardio machines and mobility equipment, this site helps improve balance and mobility, reducing the risk of falls and enhancing overall quality of life. With its targeted design, it's an ideal addition to senior living communities and health centers.

CIRCUIT 10

SOL200302

Take your indoor circuit outdoors. Circuit 10 is a compact yet complete circuit training area. It includes some of the most popular indoor cardio and strength training machines, all adapted for outdoor use. This package also includes a timer, making it perfect for interval training.

ACTIVE AGERS XL

SOL200202

The best fitness solution for senior citizens. The spacious Active Agers XL site provides the perfect environment for older adults to stay active. Equipped with cardio machines and mobility equipment, it helps improve balance, preventing falls and reducing other age-related risks. In addition, the strength machines help maintain muscle mass and improve bone density. The Active Agers XL also features a circular walking path, offering a space to boost cardio health and foster community.

COMMUNITY S

SOL200602

A fitness solution that attracts. The compact Community S offers a diverse range of street workout and cardio equipment, perfect for bodyweight exercises and high-intensity interval training. Its versatile equipment makes it suitable for everyone from teens to adults, while its compact size makes it an excellent choice for housing areas, city spaces, and parks.

COMMUNITY L

SOL200802

A space with something for everyone. The Community L is an ideal site for users of all abilities, offering a variety of equipment, including street workout, cross-training, and cardio options. It's spacious enough for individual and medium-sized group training, yet compact enough to fit comfortably in housing areas, city spaces, and community parks.

COMMUNITY M PREMIUM

SOL201302

The best of indoor fitness, now outdoors. This high-end outdoor solution delivers the same workout experience you'd expect from an indoor gym. It features cardio equipment like a cross-trainer and bike, both with adjustable resistance, as well as steps, strength, and functional training equipment. Users can enjoy a full-body workout in a refreshing outdoor setting.

COMMUNITY L PREMIUM

SOL200902

The best of the best. The Community L Premium is the perfect example of an indoor fitness center recreated outdoors. Equipped with everything from strength and cardio equipment to functional and cross-training elements, it requires only the space of half a basketball court. With popular features like the Suspension Trainer and Magnetic Bells, this site is sure to attract users and keep them coming back time and time again.

COMMUNITY XL

SOL201102

A combination of effective and fun training. The Community XL offers a wide variety of exercise options, from cross-training to an obstacle course, creating the perfect blend of cardio, agility, and excitement. With everything it provides, this site is the ideal solution for motivating group training and encouraging social exercise.

INCLUSIVE XL

SOL201502

The most inclusive outdoor fitness solution. The Inclusive XL sets the gold standard for how inclusive outdoor fitness can be achieved. This site provides opportunities for everyone, regardless of ability. It features accessible stations for wheelchair users, individuals with limited eyesight, and those with balance or mobility challenges. Its design emphasizes diversity and inclusiveness, incorporating intuitive, user-friendly equipment with adjustable resistance and supportive elements.

INCLUSIVE L

SOL201402

Fitness for all. Inclusiveness means providing something for everyone. At this site, many of the exercise stations are directly accessible from a wheelchair, allowing individuals who rely on mobility devices to train alongside able-bodied users. Whether for solo workouts or group training, this site fosters an inclusive fitness experience for all.

STREET M

SOL201902

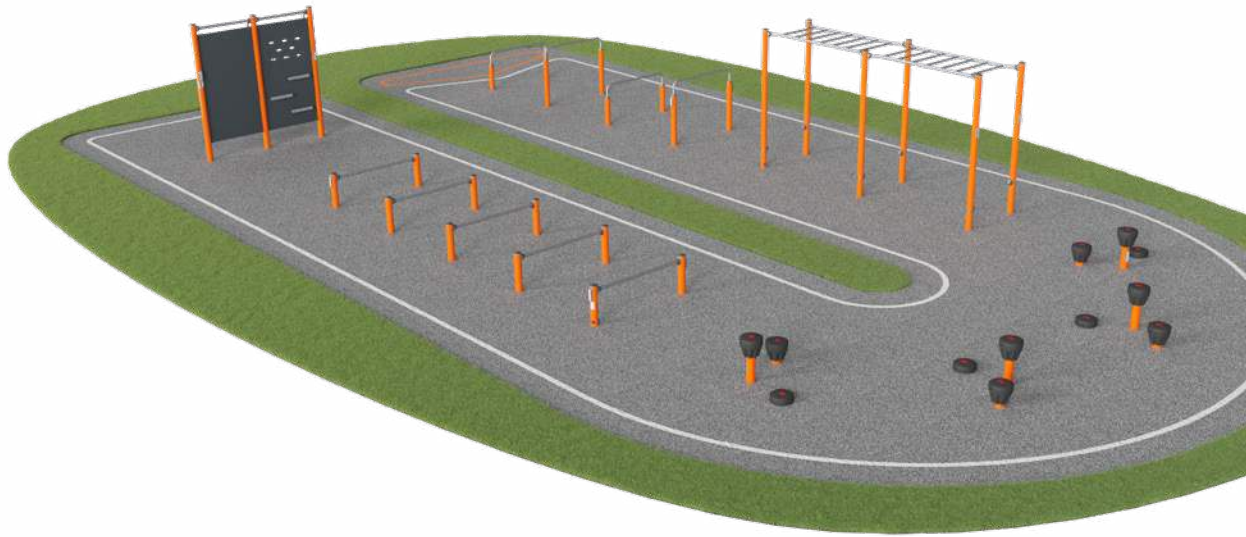

Where bodyweight exercise meets fun. The Street M is a compact fitness site, offering more than 70 bodyweight exercises that are as enjoyable as they are effective. With equipment for upper body, lower body, and core training, along with surface elements designed for high-intensity interval training, this site has it all. Whether working out individually or in a group, users are guaranteed a fun, full-body workout.

OBSTACLE COURSE S

SOL201602

Just follow the track. This compact obstacle course may be small, but it's packed with engaging challenges from crawling and jumping to swinging, climbing, and running. The combination of exercise and fun makes the Obstacle Course S the perfect solution for schools and sports clubs looking to keep participants active and entertained.

WOOD S

SOL202302

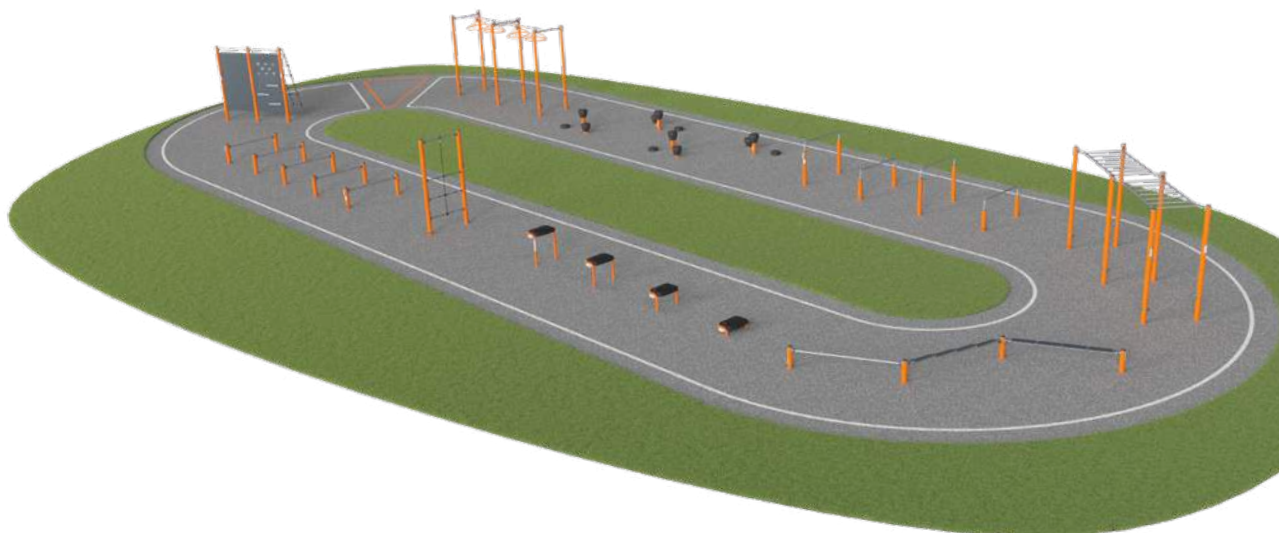

Fitness that's close to nature. The Wood S combines exercise with natural elements. Featuring equipment like the Combi 2, parallel bars, and balance beam, it offers more than 40 exercise options. Paired with the increasingly popular robinia wood, this site blends seamlessly into both natural and urban settings.

OBSTACLE COURSE M

SOL201702

Try it if you dare. The Obstacle Course M features eight challenging obstacles, making it long enough to turn a single round into a full training session. At this course, you'll run, jump, crawl, and climb your way through. Users can approach the course at their own pace, however, by choosing to tackle the full course or utilize the stations individually. With its length and variety of exercises, the Obstacle Course M is the perfect solution for schools, sports clubs, universities, and military bases.

WOOD M

SOL202202

A natural magnet. The Wood M offers over 70 bodyweight exercise options, ranging from simple to challenging. The low pull-up bars and push-up bars at varying heights provide easy starting points, while more advanced users can push their limits with this versatile solution. Crafted from durable and sustainable robinia wood, the Wood M is an ideal choice for any outdoor setting.

FITNESS PRO

Discover the pinnacle of outdoor fitness with our award-winning product line Fitness PRO. Created to the highest possible standards, combining beautiful aesthetics with human-friendly design. The PRO line intrigues any park or recreational space and draws you in.

PRO CARDIO

Adjustable Interactive Workout

The striking Cardio range has been awarded the Good Design Award for its innovative and high-quality design. Our Cardio bikes have adjustable resistance and are geometrically tailored to specific workout needs.

The Arm Bike is wheelchair accessible, and the Cross Trainer has an innovative sprint mode for shaping thighs and glutes. All machines are on par with the best indoor machines!

PRO STRENGTH

Full-Body Workout with Adjustable Equipment

The Strength range is a high-quality replication of an indoor exercise setup. These machines use the same biomechanics and resistance mechanisms as indoor selectorized strength machines. These are game changers for the outdoor fitness space!

The machines are safe, easy to use, and time efficient because of the controlled movements and quick, straightforward resistance selection.

FITNESS ESSENTIALS

Experience the Essentials fitness product line, where functionality meets versatility. This range excels in flexibility and modularity, offering exceptional value for money. Enhance your community with the Essentials range and provide an adaptable, cost-effective fitness solution.

CARDIO

Cardio Equipment for Every Workout

The meticulously designed Cardio range features a variety of fitness machines. The Cross Trainer appeals to a wide demographic with its low-impact, full-body movement. Ergonomically optimized, it offers 10 adjustable resistance levels, making it suitable for both rehabilitation and athletic conditioning.

The Arm Bike is inclusive for all fitness levels, featuring smooth magnetic resistance and adaptable usage. The recumbent bike, ideal for seniors, boasts a comfortable design, adjustable backrest and ten resistance levels.

Lastly, the versatile Bike caters to various intensities, from gentle exercises to intense sprints, with an adjustable seat accommodating users of different heights.

FITNESS WOOD

The Fitness Wood product line is a smaller wooden range made from robinia. This range combines flexibility and multifunctionality with a lower carbon footprint. Enjoy the same high functionality as the Essentials range while enhancing your park or recreational area with adaptable and cost-effective fitness solutions.

STREET WORKOUT WOOD

Street Workout in a Natural Style

Our Street Workout range is also available in Robinia wood. This brings the urban street workout trend into a natural environment - or the natural environment into an urban setting.

Robinia wood is a solid material with very high levels of natural oils. It's also the most suitable material for an outdoor fitness solution as it provides long-lasting quality with low maintenance needs.

For a greener future

Robinia wood:

Nature's own material, harvested from European forestry. Robinia wood is known for its natural preservatives that make it long lasting in the outdoors.

MULTI-SPORT

PARK GAMES

MUGA SOLUTION

In a corner of the local park, this exciting sports area is perfect for kids, teens and adults alike. It's a place where fun and ball games run wild and energy knows no bounds. The goals and courts invite children to engage in thrilling football and basketball matches, while the unique baskets add a fun twist to their playtime.

This dynamic space not only promotes physical activity but also fosters friendships and teamwork. It's a spot where kids can laugh, play and grow together, making it an invaluable asset to the local community's lively spirit.

Let's play

SCHOOLYARD GAMES

MUGA SOLUTION

This schoolyard has been transformed into a hub of activity and fitness with an exciting sports area! The space offers a perfect blend of team sports and individual workouts, encouraging everyone to stay active and healthy. The multi-use game area is ideal for fostering team spirit and friendly competition, while the street workout equipment challenges physical limits.

This dynamic environment not only promotes physical well-being but also enhances social skills and resilience. It's a place where school pupils can unwind, build friendships and develop a passion for being active, making it an invaluable addition to any school.

Multi-Activities — The Ball is in Your Court

The MUSA is to sport what a convenience store is to shopping. It provides an optimized arena, a focal point for activity, and a place specifically designed to satisfy a need. These compact stadiums are an essential social asset in creating a healthy and engaging community.

MUSAs are where rules are not set in stone but most certainly agreed upon. The only common rule is to have lots of fun.

COSMOS MULTI-SPORT

A Player-Friendly Experience

Cosmos Multi-Sport offers a variety of sporting activities. An NBA-standard height basketball hoop enticingly hovers over the area while goals and nets invite users to participate in friendly soccer games. Here, games of any style encourage social interaction, light-hearted competition, and friendship - all while promoting active and healthy lifestyles.

Similar to the rest of the Multi-Sport range, the Cosmos invites passing children to stop and ask, "Can I join?"

AGORA™ PICNIC

Inclusive Design as Standard

Agora Picnic is a flexible and freestanding furniture set for ten people. The bench and tabletop are made of high-quality ash wood and HPL (high-pressure laminate) or perforated steel. The steel frame is galvanized with the option of powder coating.

Keeping the sides open makes it easy for wheelchair users to approach the table and be comfortably seated. The picnic table is available in two sizes.

FUNCTIONAL SAFE SURFACING

The choice of creative designers

KOMPAN provides high-quality wetpour surfacing solutions. From a safety perspective, this surfacing gives a brilliant shock absorption.

With multi-colored safe surfacing, designers can be very playful and the children love it!

Different colors, shapes, and graphics can support and highlight an overall design theme and also extend play from the equipment into the surface.

The soft yet firm surfacing is highly inclusive, making it possible for wheelchair users to easily access the playground. From an operational point of view, this type of surfacing provides a clean and comfortable surface with very low maintenance costs.

Created for outdoor fitness
Leveraging the surface to apply patterns for outdoor fitness significantly maximizes the training potential by offering more exercise opportunities.

Emphasize the architectural expression
of an area with surfacing available in multiple colors and several blends.

Rubber graphics

Different rubber graphics in 2D and 3D can emphasize a design theme and increase both play value and learning.

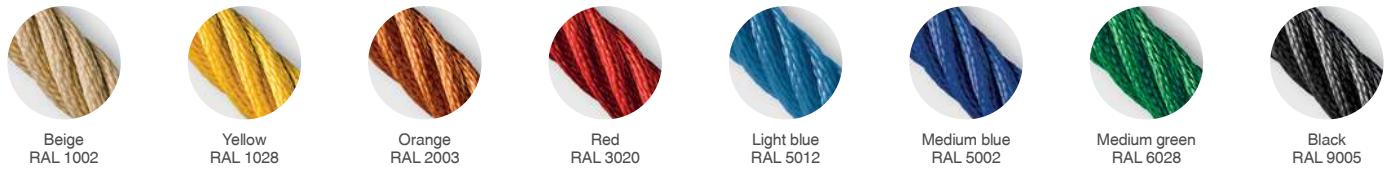

COLOR OPTIONS

Multiple ways of customizing outdoor play and fitness solutions

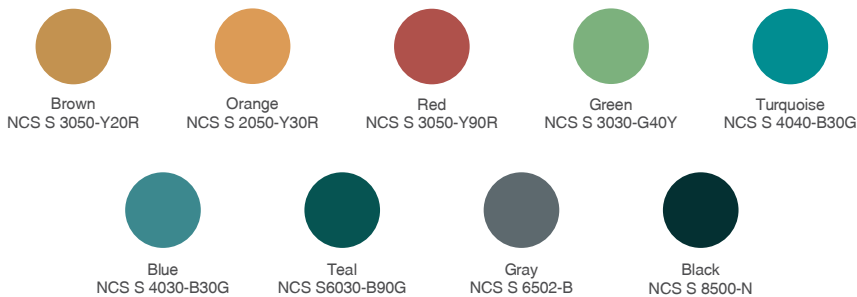

Tempered Corocord rope with EcoYarn™

For rope used in play equipment, we offer eight different rope colors to choose from. The assortment is a wide span of colors ranging from elegant and expressive black or natural and toned-down sand color to a range of attractive and eye-catching signal colors. The ropes are made from >95% post-consumer recycled material.

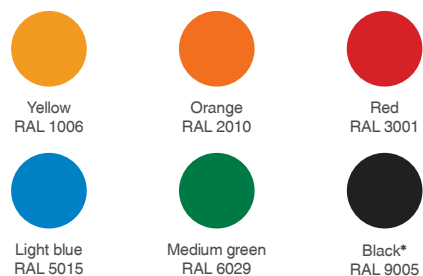

Robinia wood

For wooden Robinia play and fitness equipment, a variety of nine enjoyable colors in dusty and transparent shades are available to choose from.

MEMBRANES

The popular membranes, which add plenty of extra play value to the play structures, also come in optional colors. Choose between six different colors.

* All membranes are available in black up to 200 cm width. Colored membranes available up to 150 cm width.

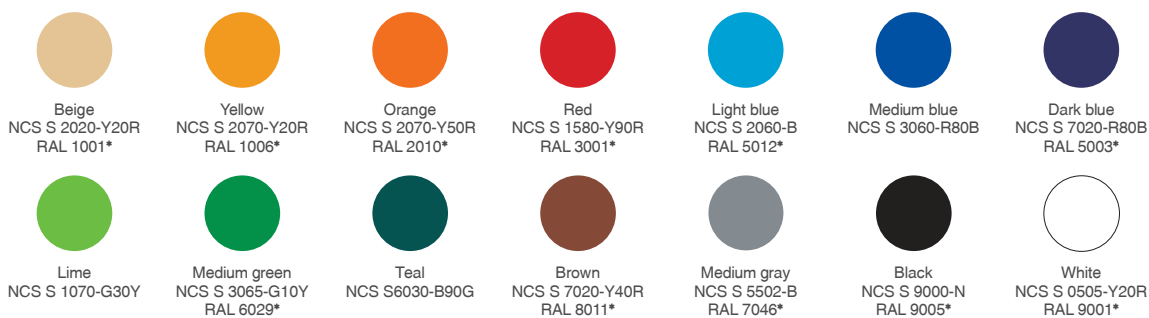

EcoCore™

- Produced from >95% recycled material
- Recyclable after use
- Supported by our lifetime warranty

The 19 mm EcoCore™ panels are made from a highly durable, eco-friendly material that is recyclable after use and produced from >95% post-consumer recycled material such as food packaging waste.

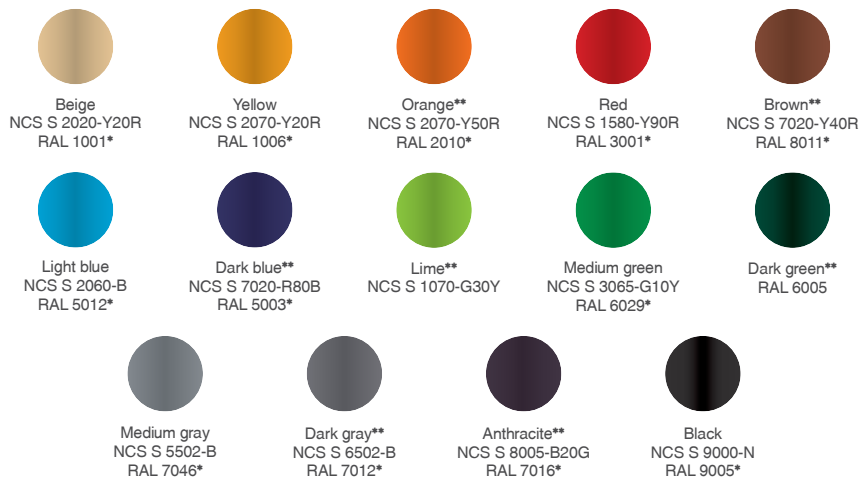

We offer a range of 14 different EcoCore™ HDPE panel colors. The assortment is a wide span of colors ranging from elegant and expressive black or natural and toned-down colors to attractive and eye-catching signal colors.

* Color code value is approximate

Steel

Distinct statements can be made with play or fitness structures by adding special colors for the steel. 14 thrilling colors are offered in the standard assortment.

* Color code value is approximate
**The color is available as matte or glossy.

For exact colors of all materials, please refer to physical KOMPAN color samples.
